Snowy Tree by Lol Cain

Nikon D300, 17-55mm, 1/60sec at f/9, ISO 1000

THIS distinctly festive image was submitted to the *Amateur Photographer* website gallery by Lol Cain. The photograph was uploaded as part of our Christmas cover competition, in which readers were asked to submit an image suitable for the cover of the Christmas issue. We had a great response, and the eventual winner was Pauline Hatcher. If you would like to see

some of the other images that were submitted, see pages 4 and 5.

Lol's image may not have made it onto the cover, but it's still a great shot. It was taken in 2010 during a heavy snowfall. Seizing a golden opportunity, Lol dashed outside and illuminated the tree with off-camera flash. The result is an image that has found its way into our Online Picture of the Week.

WIN! Each week we will choose our favourite picture posted

on the AP Facebook and Flickr communities and the AP forum. The winner will receive a year's digital subscription to AP worth £79.99.

Send us your pictures If you'd like to see your work published in Amateur Photographer, here's how to send us your images: Email Email a selection of low-res images (up to 5MB of attachments in total) to appicturedesk@timeinc.com.

CD/DVD Send us a disc of high-resolution JPEG, TIFF or PSD images (at least 2480 pixels along its longest length), with a contact sheet, to the address on page 20. Via our online communities Post your pictures into our Flickr group, Facebook page or the gallery on our website. See details above.

Transparencies/prints Well-packaged prints or slides (without glass mounts) should be sent by Special Delivery, with a return SAE, to the address on page 20.

nistmas covered

We had a fantastic response to our cover competition, but there could be only one winner...

ast year we decided to hold a competition asking readers to provide an image for the cover of the Christmas issue. After announcing it, we crossed our fingers and hoped that something usable would be forthcoming. After all, to be suitable for the cover an image needs to be more than just a good photo. It also needs to be simple and uncluttered, so that cover lines can be easily read, and with enough room at the top for the AP masthead. Most people only look at a cover for a second or two on the newsstand, so the cover image needs to immediately convey what it's representing. For our needs, the photograph would have to convey the theme of Christmas without being too

Fortunately, we needn't have worried - we were inundated with great images and in the end were spoilt for choice. So this year, emboldened by our previous experience, we did it again. We were still just a tiny bit nervous - what if last year was a fluke?

Well, I'm happy to report that it wasn't. This year we invited readers to post either to our website gallery or into our new Flickr pool, launched earlier this year, and between them we had more than 650 entries.

Choosing the cover

cheesy or obvious.

We had some beautiful landscape images submitted, but given that last week's issue was on winter landscapes and one of our January issues will also lead on the subject, we made the decision to go with something different for the cover of our Christmas issue. We did, however, choose one of the submitted landscapes to illustrate last week's issue (13 December), so well done to Edward Rhodes.

Having gone through all the images, we chose about 20 to mock up as covers. These were then whittled down to a final five, which were then tested for impact by placing them on our magazine rack in the office, among a selection of other covers.

Finally, we settled on a great cover shot by Pauline Hatcher. It has everything we want from the cover image: colour, a Christmas theme and lots of space for cover lines. It's also a great example of the difference between a good image and a good cover image. Had this picture been submitted for a regular photo competition on the theme of Christmas, it may have been penalised for its unbalanced composition and areas of dead space, but for our needs these were positive attributes.

The photographer

Pauline Hatcher, from West Sussex, took the winning shot during a shopping trip to Portsmouth in Hampshire last Christmas. 'The lights are on the mast of HMS Warrior, in the Historic Dockyard,' she explains. 'I took a sharp image of it too, but I preferred the bokeh and shapes in the out-of-focus one.' She took the picture on her Nikon D5200 and 12-24mm lens.

So what will Pauline be spending her prize money on? 'Well my husband just bought me a Panasonic Lumix DMC-GX7, so I'll be putting the money towards a prime lens for that,' she says.

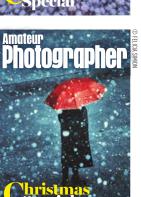

Cover tips

- is to stand out from the other covers on the shelf. Before submitting an image, look at your shortlist as thumbnails in an image browser, such as Adobe Bridge. Which images draw your attention and stand out from the rest? These are likely to be the ones that will make the best cover photos.
- It sounds obvious but magazines are mostly portrait format, so shoot in portrait orientation. Although it's possible to crop from a landscapeformat image if the resolution is high enough, it's best to use all the available pixels where possible. Remember, we need around 3600 pixels on the vertical axis.
- Don't crop in too tightly, leave lots of space for cover lines. Busy images with lots of detail are generally unsuitable as cover images, as they make superimposed text difficult to read. There should also be plenty of space at the top for the magazine masthead.
- If shooting especially for the cover, try various angles and subject placements, with the main focal point to the left, the right and centre, to give the art editor lots of options for where to put the cover lines.
- If you're submitting a portrait, it's generally best to have good eye contact, with the subject looking directly into the lens. Covers where the subject has a strong gaze tend to draw the viewer's attention much more than covers where the subject is looking away. Also, the eyes should be pin-sharp.
- Remember, magazines work well ahead of the publication date - especially monthlies – so if you are submitting seasonally dependent images (such as spring flowers), you will need to send them four to six months before the issue comes out.

Amateur Photographer

Student entries

We couldn't write about our cover competition without mentioning Basildon Academies, whose students entered en masse. They weren't successful this time, but there were some really imaginative interpretations.

Winter landscapes

We received so many great winter landscape shots we felt it a shame not to use any. Fortunately, last week's issue led on that very theme, and this lovely image by Edward Rhodes fitted our needs perfectly.

Photographers' rights... and 'wrongs'

JUST when overzealous officialdom seems consigned to history, an incident jumps out that leads us to think again.

Among the highlights, or rather 'lowlights' of 2014, was not a run-of-the-mill photographer versus overzealous security clash.

In no less subtle a move, Facebook bosses controversially chose to remove AP reader Penny Halsall's portrait of her four-yearold daughter Daisy from AP's Facebook page, claiming it breached Facebook's rules on nudity. AP had uploaded the black & white image to celebrate it winning honours in the APOY contest so, needless to say, we were forced to intervene. Facebook eventually relented, saying it had made a mistake, and Penny's photo was reinstated. The U-turn by one of the world's most powerful websites was a victory for common sense.

Other 2014 rights shockers included...

- Richard Selby, 81, being stopped in Brighton by police, who said his street photos of women on a hen night could be considered 'antisocial'.
- The Hull shopping mall, which made it onto the map of 'ridiculous' security incidents, when it stopped tripod-equipped photo enthusiast Bob Riach outside amid fears of an Isis terror attack.
- Octogenarian Mike O'Regan spoke of how police urged him to delete a photo of a child playing on a bungee trampoline at a shopping centre in Derby at the request of the child's mother. He hadn't broken any laws.
- And finally, across the pond, fashion photographer Allen Henson was sued for \$1m by the Empire State Building after taking an image of a bare-breasted woman at the top of the iconic New York building.

Bright lights and fashionistas

PENTAX made clear that its cameras must appeal to a younger audience, as more people take pictures on their phones. Not enough of them were taking the next step and buying a proper camera.

The philosophy came to life in the newly styled 20-million-pixel K-S1 DSLR, which sported a row of flashing LED lights built into its handgrip.

In a similar vein, Olympus bosses decided to aim its Pen-branded compact system cameras at young, fashion-conscious women who do not fear the lack of a viewfinder – hoping they will promote the brand through social media. Cue the Pen E-PL7, billed as a camera for fashion bloggers.

The move followed Olympus's success at selling CSCs to women in Japan.

A year in photography

Audiences hooked on classics

cLASSIC looks continue to have the camera audience in raptures. Before a quizzical Photokina crowd, Leica took the traditional feel to extremes by launching a special edition of the Leica M, a digital rangefinder, without an LCD screen. In its place was an ISO dial.

As high-end compacts survived the unrelenting smartphone onslaught, Panasonic showcased its DMC-TZ60, with a 30x Leica zoom.

Fujifilm's £479 X30 had an OLED EVF and a sensor without a low-pass filter – a move first introduced in high-end system cameras.

Leica's APS-C-sized X was among the stars of Photokina, with its 23mm f/1.7 (35mm equivalent) Asph lens. Meanwhile, Fujifilm's X100T brought handling and operational refinements.

The fixed-lens vanguard also included Sony's Cyber-shot DSC-RX100 III and the 4K Panasonic Lumix DMC-LX100.

Then there was the DP Quattro, prompting Sigma to claim it had just reinvented the camera, no less.

The digital Leica M with no LCD and Sigma's DP1 Quattro

Big two fight for dominance

NIKON kicked off the year by downsizing its entry-level DSLR to reveal the 24.2-million-pixel D3300, but with no built-in Wi-Fi.

The firm pledged to confront flagging CSC sales and conquer the ailing compact arena – launching nine Coolpix compacts at CES alone. Its star announcement at the Las Vegas show, however, was the professional full-frame D4S, promising improved AF.

Nikon was keen to show AP how its D4 and D800 were delivering live news broadcasts at new TV station London Live, by granting us a behind-the-scenes tour.

All this as Nikon revamped the D800 to reveal the D810, claimed to deliver the highest image quality in Nikon history.

The firm's final full-frame DSLR of the year was the D750, sitting above the D610, with a tilt screen. This time the Wi-Fi was built in.

Nikon moved from front foot to back foot at Photokina, defending its lack of a large-sensor compact system camera and dismissing rival models as no longer 'compact'.

In a potentially contentious move, Canon ditched the optical viewfinder on its PowerShot G1X Mark II, although it added a 5x f/2 lens.

Canon's G7 X became the first Canon compact with a 1in-type sensor.

It also revealed its 'premium-feel' EOS 1200D DSLR (above), and Photokina would see the EOS 7D Mark II, with a 65-point AF system.

And as demand for bridge cameras defied the compact crash, Pentax debuted the 16-million-pixel XG-1, hoping to entice people away from traditional compact cameras... maybe its 52x optical zoom and £280 price tag would help.

CSCs on attack as DSLRs flag

LEICA leaped onto the CSC bandwagon with its new touchscreen-equipped T, declaring it would be as big as its legendary M. It had clearly spotted a big opportunity amid the picture-taking explosion heralded by smartphones.

Sony Japan revealed plans to take on Canon and Nikon and shake off what it said was a general perception that CSCs are 'inferior' to DSLRs. Speaking just weeks after its 12-million-pixel full-frame Alpha 7S had gone on sale, Sony said its Alpha 7 series had helped

boost the image of CSCs among professionals. The Alpha 7S's features included a silent shooting function, plus a sensitivity of ISO 50-409,600 – rivalling the D4S.

Also marching into the CSC vs DSLR war zone was the Fujifilm X-T1. Fujifilm claimed that the 'ultra-fast' EVF was 'almost indistinguishable from an optical viewfinder'.

Other notable CSCs included the Sony Alpha 6000 and Samsung NX1, a camera set to go into battle with the Olympus OM-D E-M1 and Fujifilm X-T1.

Social media 2014

The popularity of social media continues, and 2014 has seen some interesting changes. **Jon Stapley** and **Paul Nuttall** round up the best of this year's social world

OVER the past few years, social-media services such as Twitter and Facebook have planted themselves firmly in the national consciousness, thanks to a host of factors ranging from international political uprising through to scandalous celebrity selfies.

In fact, it could be said that 2014 was the year of the widespread adoption of social media across traditional media platforms. Few news broadcasts go by without some form of input from eager tweeters, be it facile comments and observations, quotes direct from celebrities' mouths (or, to be more accurate, feeds), or more weighty photographic footage direct from the event in question.

It's not solely the preserve of news outlets, however, as more photographers are turning to social media to increase their following, share their work and engage with a larger photographic community than was ever possible before. Photographers have even found ways of making money through their Instagram accounts, as we've explored in recent AP features.

We've taken a close look at how photography sits within the world of social media in 2014, and how it might continue to develop in 2015 and beyond.

Twitter

LIKE most things in life, Twitter is as good as you make it. If your feed isn't particularly inspiring, it's because you're not following particularly inspiring people. Fortunately, that's easy to remedy. The photo world has its fair share of people who are good value on Twitter. Here are a few who have stood out for us throughout 2014.

@Photocritic

Followers: 55,000+

Haje Jan Kamps has not only produced several popular photography books, but he has also masterminded crowdfunding successes such as Triggertrap. As such, he's well up to date on the latest crowdfunding projects.

@benlowy

Followers: 11,000+

We interviewed Ben Lowy for our feature on using iPhones for professional photography (AP 1 November), and he told us how he uploads a photo to his blog every day. He wasn't kidding. Keeping up with him on Twitter could be the kick up the backside you need if you're not taking enough photos.

Legendary photojournalist and lighting expert Joe McNally posts regular updates from his blog and sample shots from the latest Nikon kit (he's a Nikon ambassador).

After all this, we should probably tell you to follow us on Twitter. So we will. **@AP_Magazine**. There. Do it.

Technology

IN 2014 it was more likely that a new camera would have some form of Wi-Fi connectivity than not, while a selection would also support a data connection for uploading directly and independently. As a result, sharing your images on social media is easier than ever before, and here are four of the best cameras for doing so.

iPad Air 2

From £400 Although iPad photographers might be derided in some circles, there's no denying the serious imaging power of the new iPad Air 2. The model features an 8-million-pixel 'iSight' camera that is capable of 1080p HD video, while full exposure control gives photographers more power than ever before.

Dubbed a 'communication camera' by Panasonic, the CM1 was announced in September of this year. It has the perfect combination of the inner workings of a high-end compact (a 1in sensor, Leica lens and Venus Image Engine) and a quad-core processor, the latest Android operating system and LTE, Wi-Fi and NFC connectivity.

Facebook

MANY people who use Facebook to share and promote their photography will remember 2014 as the year when this got significantly harder to do. The brains behind the world's most populated social network are constantly tweaking what its users see from other users, and many of these changes have had an impact on photographers' pages. Here are a few tips for how to beat the system and get your images seen on Facebook.

Share lots, but pay attention to quality

An individual's Facebook news feed (what they see from others when they log in) used to be more or less a chronological representation of what their friends were posting, but this is no longer the case. Now, a complex series of algorithms determines what appears there. So even if someone subscribes to your page, they won't necessarily see all, or even many, of the photos you post on their personal feed.

Therefore, don't be afraid to post your images of choice often. More images means more views, and views by different people.

However, Facebook's algorithm favours posts that garner lots of attention – likes, comments and shares. So post away, but be discerning – three good photos that get a lot of attention will cast a wider net than six mediocre ones that don't.

Balance self-promotion with sharing

Read a good article, seen a funny video or discovered a special photographer? Share it with your Facebook followers, and discuss it in the comments. If you can increase your page interactions, people will be more likely to see your other posts.

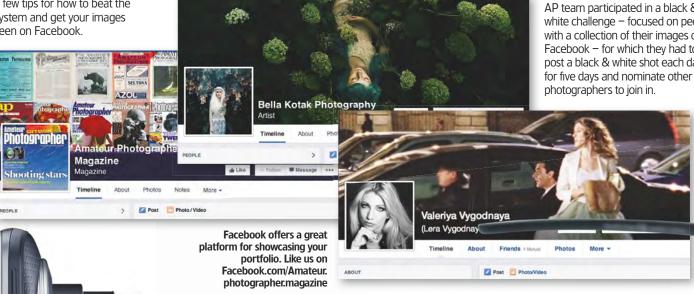

Follow and connect with interesting people

Think of a photographer you like. Chances are they're on Facebook, complete with a wide selection of their latest and best images. Look them up, like their page, comment on photos you like. However (important), resist the urge to bother them with links to your own page or to beg them to share your stuff with their followers. No one likes people who do this.

Get involved with games and challenges

Often, photographers on Facebook will nominate one another for challenges, and this is a good way to show off some shots from the archive while having a little fun as well. Recently, a few members of the AP team participated in a black & white challenge – focused on people with a collection of their images on Facebook – for which they had to post a black & white shot each day for five days and nominate other photographers to join in.

Samsung Galaxy K Zoom

One area in which smartphones struggle is their focal range, although that's not a problem shared by the Galaxy K zoom. Despite maintaining the same compact proportions as many other Samsung smartphones, the Galaxy K zoom packs a 10x optical zoom covering a 24–240mm focal range in 35mm equivalent terms.

Google Glass Explorer Edition

• £1,000

For a four-figure outlay, you can be one of the first owners of Google Glass. The already-infamous wearable technology may not yet be mainstream, but equipped as it is with a truly take-everywhere 5-million-pixel camera, it's surely the shareable image platform of the future.

A year in photography

Poll vault

We do a lot of talking around here, so once a week it's nice to shut up and let you lot have your say in our opinion polls. **Jon Stapley** looks at

When was the last time you shot a roll of film?

A I always shoot film	48%
B In the past month	24%
C Earlier this year	6%
D 1-5 years ago	6%
E More than 5 years ago	15%
F I've never shot film	1%

Well, that was a turn-up.
Apparently, according to this poll, almost half of all the photographers out there exclusively shoot film! Someone should probably tell Canon and Nikon...
This was by quite some

way the most popular poll we ran this year, accruing a total of 2,414 votes. For context, the previous week's poll on photographic history garnered 320 votes.

Now, I wouldn't want to suggest that parties with a marked interest in promoting film might have drawn attention to this poll online, nor point out how many people we spotted doing exactly that on Twitter with the hashtag #BelievelnFilm. Therefore, I will say nothing else about this poll. Well done, film.

Has your opinion of smartphone cameras changed?

A No, I don't think they should be considered true cameras	31%
B No, I have always considered them to be a useful tool	19%
C No, as they get better they will be fantastic but they aren't there yet	16%
D Yes, they have become serious tools	15%
E Yes, I was excited at the prospect but have so far been unimpressed	7%
F None of the above	12%

At first, it seems that those who disdain smartphone photography have the largest share of the vote, but this isn't quite true. If you count the 'not quite there' respondents as optimists (given the line 'they will be fantastic'), those with positive things to say about smartphone cameras reach 50%! We've featured plenty of photographers doing great things with phones, from landscapes to reportage.

Do you think taking pictures of a place gets in the way of enjoying the experience of being there?

A Yes, often	11%
B Yes, sometimes	37%
B No. not at all	52%

Records of family are wonderful things, but do you want your children and grandchildren to know you exclusively as some sort of glass-nosed robot who spends Christmas insistently clicking at them? And surely we've all met iPad Gig Idiot, who spends his evenings ruining concerts for everyone by holding up a bright tablet screen to capture unwatchable footage (does he watch it later? No one knows). In truth, though, I find myself agreeing with the 52%. Although it can be a pain to be fiddling with settings while wonderful things unfold in front of you, having a record of them in the form of a great photograph makes it worth it.

Are you impressed or appalled at the idea of using 4K video for stills photography?

A I'm sold – it will be a useful tool	
that could transform my photography	13%
B I'd give it a go if it was available, but I can't see a regular use for this feature	23%
C I'd try it, but I'd feel a little like I was cheating if I used it for stills	7%
D I've no interest in it as it is of no benefit for the type of photography I do	38%
E Although it would make my photography easier, the quality isn't good enough	7%
F It's cheating. I'd never use it and don't think other photographers should either	12%

We braced ourselves for a storm of outrage on this one, but were actually rather surprised by the results. While the general sentiment on the idea of using 4K video for still photographs was negative,

about the same number said they were completely sold on it as decried the notion as unspeakable heresy. It's a thorny debate, but we were pleased to see a decent number of people who were curious about the idea.

How many years have you been reading *Amateur Photographer*?

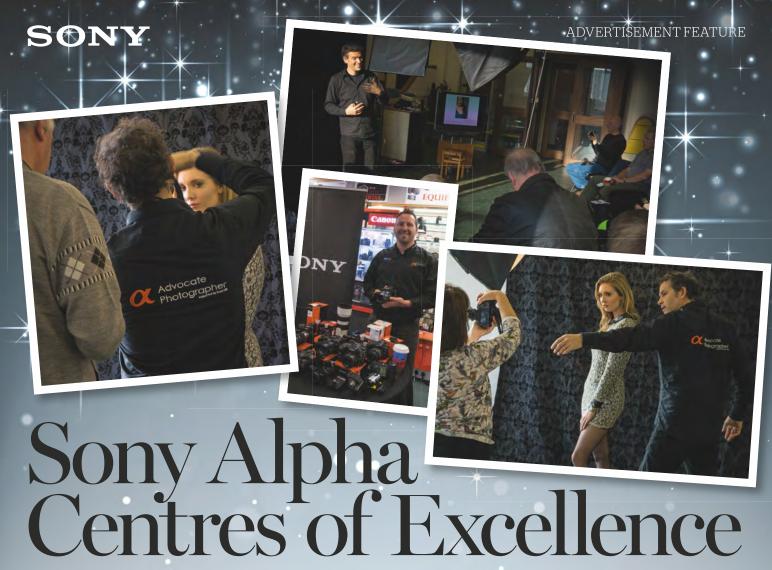

A Less than one year	52%
B 1-5 years	11%
c 6-10 years	11%
D 11-20 years	7%
E 21-30 years	11%
F More than 31 years	8%

When we unveiled the biggest redesign of AP in more than a decade, we couldn't resist finding out how long some of you had been with us. It was great to see such a mix of responses, especially the huge

proportion of you who have joined us in the past year – encouraging news for the future! A special shout-out

goes to our readers of more than 31 years, whose loyalty is at least seven years older than our two youngest writers.

When **Michael Wayne Plant** led a free portrait photography workshop at London Camera Exchange in Bristol, **Richard Sibley** went along to investigate

few weeks ago, customers of the Bristol branch of London Camera Exchange were invited along to a free portrait workshop, held in the shop's studio by leading portrait

photographer Michael Wayne Plant. All of the latest Sony cameras were available to try, including the new Sony Alpha 7 II, and Michael started the session by explaining the different settings and features of each of the models in the range.

The new Sony Alpha 7 II

The perfect camera, whatever the situation

With a 24-million-pixel, full-frame sensor, the Alpha 7 II has all the resolution you need, whether you're shooting landscapes or portraits. Plus, the new 5-axis in-camera sensor stabilisation and faster AF system mean that the Alpha 7 II is just

as capable for fast-moving images, especially when paired with the FE 70-200mm f/4 G OSS lens, or the A-mount 70-400mm f/4-5.6 G SSM II Super Telephoto Zoom optic and LA-EA4 35mm full-frame A-mount adapter.

With the cameras and studio lighting set up, it was time to photograph the model. For many photographers this can be a little daunting, but Michael explained how to make sure that both subject and photographer are relaxed. We then learned how to correctly pose a subject to create a flattering image, before taking some images.

Michael was on hand to guide the students, as one by one everyone had the opportunity to try each of the cameras and lenses, and put what they had just learned into practice. And most importantly, everyone walked away with some great images.

Centre of Excellence

Up to £200 cashback

SONY is offering up to £200 cashback on selected Sony cameras, lenses and other accessories between now and 25 January. For example, if you purchase a Sony Cyber-shot DSC-RX1 or RX1R, you will receive £200 back. The Alpha 6000 comes with £50 cashback, with £100 cashback on the Zeiss Vario Tessar T* 24-70mm f/4 ZA OSS lens for the Alpha 7 range.

Ghampions Champion

What were your favourite winners from 2014's photography competitions? We take a look at nine of the best and ask you to vote for your favourite

Jacqueline Roberts took the top award at the Royal Photographic Society's 157th International Exhibition

ooking through the images submitted to the various photography competitions that take place throughout the year is so much more that just viewing a bunch of nice pictures. A careful analysis will show just how democratic the field of photography is. Images taken by professional photographers can fit comfortably side by side with those taken by so-called amateurs.

This year saw some stunning entries from the Royal Photographic Society, Landscape Photographer of the Year, World Press Photo Awards, Wildlife Photographer of the Year, British Wildlife Photography Awards, Taylor Wessing, EISA, Sony World Photography Awards and International Garden Photographer of the Year. Of the images here, we want to know your favourite. To have your say, visit www.amateurphotographer. co.uk/champion.

John Stanmeyer's image of African migrants raising their phones in an attempt to catch a signal from neighbouring Somalia was awarded the overall winning image at the World Press Photo Awards

The always-controversial Taylor Wessing Portrait Prize took a surprising turn this year, with fashion photographer David Titlow taking top spot with his image of the aftermath of a summer party

Li Chen's travel image took first place at this year's Sony World Photography Awards Open Category

UK-based architectural photographer Billy Currie was awarded first place at this year's EISA Maestro awards

The overall winner of this year's Landscape Photographer of the Year was Mark Littlejohn with his shot taken at Glencoe in the Scottish Highlands

Photographic artist and journalist Michael 'Nick' Nichols took the top prize at the Wildlife Photographer of the Year with this image of resting lions in Tanzania

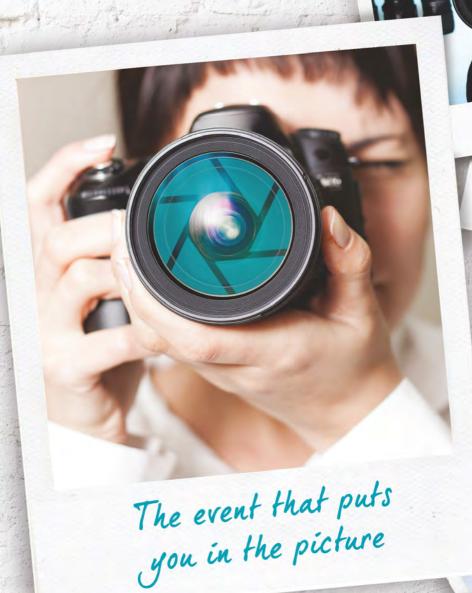

Lee Acaster's image of a greylag goose in London took to the top spot at this year's British Wildlife Photography Awards

Rosanna Castrini's image titled 'My Prairie Garden' took the overall prize at the 2014 International Garden Photographer of the Year competition

The Photography Show is the event for aspiring photographers of all levels.

With an incredible line-up of exhibiting brands, show bargains, live demos and inspirational speakers, you'll enjoy a great day out dedicated to all things photography.

Book your tickets today at:

photographyshow.com

Nigel Atherton Editor

This has been a mixed year for the photo industry. Manufacturers and retailers continue to struggle with falling sales, due to the economic climate and the fact that the pace of innovation is starting to plateau. Continuing debates about the ethics of photography in public places, the right to privacy and copyright protection in a digital world have been joined by new issues for lawyers to argue about, such as camera drones - 2014 was the year they went mainstream. But, on the other hand, we saw

some amazing photography, some great new products and, of course, our biggest redevelopment of AP in over a decade – which has been a huge success, both critically and in terms of sales. (No mean feat, given that magazine sales in general are falling as much as camera sales).

All this is due to you, the readers, so I'd like to thank all of you for your support, and hope you'll continue to enjoy what we have in store for you during 2015. If you don't already, why not subscribe? You'll save money and quarantee you won't miss an issue. The details are on page 80. Merry Christmas!

Phil Hall

Features and technique editor Just as a sportsman looks to refine an element of their technique to make them a stronger athlete, so too should photographers take a step back and look at areas where we can improve our skills. The closing of one year and contemplation of the next seems like the perfect opportunity.

We probably all like to think of ourselves as reasonably competent photographers, but if we look coldly at our images, we'll see where we

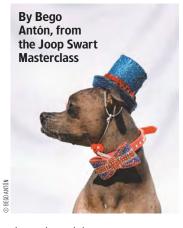

can up our game. For some, this may just require a few little tweaks here and there, but for the rest of us there will be some bigger areas to improve upon.

It could be as simple as being more dedicated and forcing ourselves to get out with our camera more, while others might want to master a subject or technique they've never really tried before. Whatever camp you fall into, look for those gaps and aim to dedicate time to improving in those areas this year - you'll become a stronger photographer for it.

Jon Stapley Staff writer

I find it heartening to see young people breaking into photography, and particularly photojournalism, which is why I always look forward to the World Press Photo Joop Swart Masterclass. The Masterclass takes a select cohort of emerging photojournalists and gives them space to nurture their personal project, with a little help from some industry old hands. The skill, bravery and intelligence these young people display invariably results in a fascinating and diverse portfolio of projects.

Earlier this year I spoke to one of the 2013 cohort, Diana Markosian. Her obvious love for photography

shone through her every sentence. With photographers like Diana among the next generation, 2015 and years beyond will be just fine.

Michael Topham,

Deputy technical editor We've all done it at some point bought a product that seemed like an absolute bargain at the time, only for it to collect dust over the ensuing few months, having seen little, if any, use. Two years ago, I picked up five Godox flashguns at a knockdown price of £20 each. That's a great buy, you might say, but they've rarely seen the light of day and have never been used simultaneously for the purpose I intended: to illuminate large subjects in landscapes during the hours of darkness and refine my multiple-flashgun, off-camera flash technique.

Looking forward to 2015, I'm eager to rekindle my passion for automotive photography, and what with my unlimited source of sports cars (my housemate just so happens to be a motoring journalist), I no longer have any excuse. I've dug out my flashguns in readiness, lighting stands are on order, and I'm genuinely excited about the prospect of getting back out there and challenging myself to shoot cars in a new and diverse way that makes my images stand out from others. Challenge set, it begs the question: what photographic challenge will you set yourself in 2015?

Richard Sibley

Deputy editor

Although the pace of technological innovation seems to have a slowed a little in the past year or so, there is still plenty to look forward to. The back-illuminated APS-C-sized sensor in Samsung's new NX1 is an interesting bit of technology, with a lot of potential. It will be interesting to see if this filters down through the Samsung range, and what Sony may release to counter it.

It also seems that more and more compact system cameras are coming out that are shaped, and act, just like DSLRs. Although we may see fewer DSLR releases in 2015 than we did this year, I'm excited to see the next generation of compact system cameras. These are the cameras that are driving sales and innovation in the camera market, and with competition as fierce as ever, I'm curious to see how Canon and Nikon will react.

Need to get something off your chest? Send us your thoughts in around 500 words to the address on page 20 and win a year's digital subscription to AP, worth £79.99

LETTER OF THE WEEK

Developing interest

I read with interest Andrew Sanderson's article on film processing (AP 1 November). Things have changed little since I was shown how to develop a film in the early 1960s! Then, we had Paterson tanks in our school photo club's darkroom (a corner of the science lab), but they were the early ones with transparent plastic spirals, and it was practically impossible to load a full length of 36-exposure film without it snagging.

However, the teachers who ran the club were very patient, and eventually we either mastered the tanks or gave up and reverted to see-saw dish development. Thank goodness that someone at Paterson eventually came up with nylon spirals!

I was much impressed by the idea put forward by Andrew in his article for washing films by three or four changes of water plus inversion – I was told (admittedly 50 years ago and before the Isle of Wight was fitted with water meters) that you should wash the film in running water for 20minutes. I have now adopted Andrew's method.

Many thanks for these articles encouraging interest in 'real' photography.

John Cole, Isle of Wight

Ah... you were doing so well until you said 'real' photography. Film photography is just a different medium in the same way that charcoal and paper, and oil and canvas are. However, I'm glad you are enjoying Andrew Sanderson's articles, as am I. They are certainly serving as a great introduction to a new generation, and as a bit of a refresher for everyone else – Richard Sibley, deputy editor

Win!

SAMSUNG

The surreal thing

'Pure psychic automatism' was how André Breton defined Surrealism in the first Surrealist Manifesto. Both Roger Hicks (*Final Analysis*, AP 27 September) and David Sherwin (*Inbox*, AP 11 October) recently defined two photographs in AP as surreal. Neither was.

To translate Breton's definition to more meaningful language, Surrealism is concerned with expressing the subconscious (psyche) without conscious intervention (automatism). The result is the dreamlike and bizarre images we see in the paintings of René Magritte, Salvador Dalí and Max Ernst. In the photographic sphere, the work of Man Ray and Lee Miller can be considered Surrealist. If you compare the two photographs in question to

these artists' work, it is clear they are not in any way surreal, even though they are fine images in their own right.

Photography has always struggled to be accepted as an art form, the more so in the current environment of a massive overload of instantly forgettable images. Truly artistic images should be labelled and critiqued correctly, otherwise photography will continue to struggle to be accepted as an art form.

Andy Finn, Hampshire

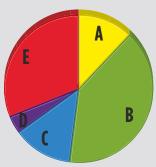

Ultimately, this comes down to a simple yes-or-no question about whether anyone has the right to define Surrealism for all time. As far as I can see, the answer is 'fish' (except pipe fish) – Roger Hicks

Behind the screen

As a fan of high-quality compacts, with Canon as my preferred manufacturer, I read

with interest your review of the PowerShot G7 X (AP 1 November), but I lost interest in the camera when I realised that it did not have a viewfinder. No matter how excellent such cameras are in other respects. they are utterly incapable of taking pictures in two conditions. One is when lighting conditions make the rear screen useless, usually out of doors, and the other is the 'grab' shot when there is no time to wave the camera around at arm's length - many shots of children and pets are missed, for instance. Obviously, the makers are fully aware of this, but as long as people buy their cameras, why should they bother to do anything about it?

I have had family and friends, bitterly disappointed when their expensive camera failed to deliver in some conditions, but since the camera is not actually faulty they have to accept it. I feel strongly that such cameras should carry

In AP 29 November, we asked...

Who do you mainly take portrait pictures of?

You answered...

A Friends	12%
B Family	40%
C Strangers	13%
D Models	4%
E I don't shoot portraits	31%

What you said

'Yes, I take lots of portraits - of dogs'

'Only my cat, if she's in the right place and stays still. My current feline has an unfortunately unphotogenic colour scheme, but time will tell'

'I don't do portraits, they bore me'

'The wife insists on regular couple selfies but those are for family and PC desktops'

'None of that posed, one/two/three/four lights, a soft box, snoot, umbrellas and power packs kind of stuff'

'I don't do portraits but often find that I have taken portraits'

Join the debate on the AP forum

This week we ask

Did you fulfil your photographic New Year's resolutions in 2014?

Vote online www.amateurphotographer.co.uk

Guess the date

Win! Every week we post an old AP cover on our Facebook page and all you have to do is guess the issue date (day/month/year). The person who is closest to the exact date wins a year's digital subscription to AP, worth £79.99. To guess the date of this cover (above), head over to www.facebook.com/Amateur.photographer.magazine. Forum members can also enter via the Forum.

The 29 November issue's cover was from 4 August 1958. The winner is Stephen Jones, whose guess of 3 August 1958 was the closest entry

a warning as to their limitations and magazines such as AP should include a warning in their reviews. Dr Cyril Bate, West Midlands

We always draw attention to whether or not a camera has a viewfinder and have discussed their merits endlessly, but even within the AP office there is no consensus. Many prefer to use the LCD screen, even when they have the choice, possibly because they shoot that way on their phones. Personally, even though LCD screens are much improved, I'd never buy a quality camera without a viewfinder, as they aid careful composition. As Charlie Waite once put it, using the LCD screen is like watching a movie with the lights on. I don't agree about grab shots, though – using the screen is surely quicker for these - Nigel Atherton, Editor

Drone laws

Regarding the recent coverage of drones, this illegal flying of quad/hex/octocopters will increase due not only to buyers thinking they can do what they like, but also the lack of advice from sellers.

It is illegal to fly over or within 50m of people, even without a

camera; it is illegal to fly at any event without permission. You must have undertaken specific training and examinations - I am myself halfway through an £800 session with EuroUSC, which involves a two-day training session and an examination followed by half a day's flight examinations.

Before you can even take off or make a video that may be for sale, you have to undertake risk assessment, have a 40-pluspage written operations manual and public liability insurance, which you will not get without the training. So, if you are thinking of getting a drone, I suggest you look at the law, because the average fine for illegal flight is £8,000-£10,000.

There will be many disappointed people this Christmas, and many arrests in the New Year.

Jeremy Rundle, Cornwall

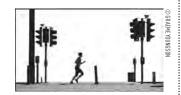

Very true! We would urge all readers to make sure they understand the law, as well as use common sense, before attempting to fly any drones in public or private spaces. It will be interesting to see just how the law is enforced, and how the law and regulations may evolve in the coming years. In the USA, there have already been test cases over whether images taken by

drones can be classed as art rather than commercial activity. There are even legal arguments over whether Americans should have the right to be able to shoot down drones taking photos or video that are flying over their property below a certain altitude. Watch this (air) space - Richard Sibley, deputy editor

White out

Regarding the shot I took at Aberdeen Beach, featured in Damien Demolder's Appraisal page (AP 15 November) and Inbox (AP 29 November), I thought I should let you know that the photo didn't feature burning out or cloning. It was taken at a lower angle than the runner – something I didn't mention when I entered the photo and which Damien therefore couldn't have known about. It meant that the runner was running against a background of pure sky.

Thanks very much for featuring my photo. I enjoyed reading Damien's comments and reader Roger King's as well. Graeme Youngson, via email

Classics Revisited

Alfred Hitchcock

By Albert Watson

Phil Hall and **Andrew Sydenham** look to recreate Albert Watson's surreal shot of Alfred Hitchcock

lbert Watson was born in Edinburgh in 1942, and after studying at both the Duncan of Jordanstone College of Art and Design in Dundee and the Royal College of Art in London, he moved to Los Angeles in the USA with his wife in 1970.

To begin with, Watson was shooting primarily as a hobby, but was introduced to an art director at Max Factor and after his first test session the company bought two shots. It was this break that saw Watson's distinctive style begin to attract the attention of numerous fashion magazines both in the USA and Europe.

In 1973, Watson photographed his first celebrity - the English film director and producer Alfred Hitchcock for Harper's Bazaar's Christmas issue. Watson said he was both delighted and terrified at the same time when he got the call, and sensing that he was perhaps a little nervous, Hitchcock, as Watson stated, 'contributed massively to the picture and suggested ways he could hold the goose... he was helping me gigantically and it was because of him that the picture was so good, I think'.

It was in 1976 that Watson would land his first job for Vogue and moved to New York. Watson is now one of the world's most successful and sought-after fashion and commercial photographers. Since Hitchcock, Watson has gone on to shoot numerous famous faces, including his iconic portrait of Steve Jobs. His images have appeared on more than 250 covers of *Vogue*, as well as a host of other famous titles, while he has been responsible for a long list of major advertising campaigns and television commercials.

The original

Alfred Hitchcock

Albert Watson, 1973

Albert Watson was 31 years old when he was asked to photograph Alfred Hitchcock. It made Watson's career and was originally intended to showcase Hitchcock's culinary skills in the Christmas 1973 issue of *Harper's Bazaar*. The final shot was supposed to shoot the director presenting a plate of roast goose under the headline 'Alfred Hitchcock cooks his own goose'.

With simple lighting that Watson has said he'd do better now, it's the unusual and informal nature of the image that makes it so successful. Watson commented, 'I don't think the picture is particularly great, but it was important to me because it gave me the confidence to do other things.'

Alfred Hitchcock, Los Angeles, USA, 1973

FURTHER READING

Albert Watson (55s) £22.95, Phaidon Press, 2007

This hardback book features more than 100 pages of Watson's images over his career and provides a good introduction

to both the commercial and personal work he has accomplished.

Strip Search £110, Chronicle, 2010

Strip Search took five years to make and is Watson's personal portrait of Las Vegas, USA. A mixture of bold and careful landscapes and striking portraits of the people who live and

work in Sin City, used examples can be found for just under £40.

Cyclops £85. Bullfinch. 1994

As well as his famous subjects, this book also covers images such as Canadian rodeo cowboys, convicts in a Louisiana prison

and a stone circle in Scotland. Used editions are available from around £40.

HOW WE RECREATED THE PICTURE

1 The set-up

The lighting set-up is pretty straightforward for this shot, only requiring a single softbox positioned above the camera and pointing directly at our subject. Either side are two black polyboards to soak up light and deliver some pleasing shadows, while there's a white backdrop at the rear.

2 The original

When recreating a shot like this, it's always a good idea to have the original to hand for reference. You'd be surprised by the little nuances you can spot when looking at a print, so you can adjust the pose and the lighting to suit.

3 Shooting

Using a moderate telephoto focal length of 80mm for the shot, the camera is positioned slightly lower than our subject and pointing upwards a little. Exposure was 1/125sec at f/16 and ISO 250, allowing us to achieve plenty of detail in the final shot.

4 Boost blacks

With the shot captured, it's now time to start the post-processing. In the raw converter, the first thing we want to do is look at boosting the blacks, particularly in the dinner jacket. To do this, we'll take back the Blacks to -71 while dropping the Highlights to -28.

5 Clarity

There's still a little work to be done in the raw converter. We can now look at the Clarity, which is a great tool for boosting local contrast between adjacent light and dark areas, as well as sharpening detail that avoids unwanted halo effects to boost midtone contrast. The Clarity has been increased to +30 in this case.

6 Convert to mono

To convert to mono, we'll use a Black & White adjustment layer, refining it slightly from the default settings to improve the tonal balance of the image a little. We'll take the Blues back to -3 to darken the bow tie on the chicken, and set the Yellows at +32 to darken the rest of the chicken.

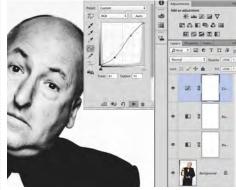

7 Adding 'bite'

While we've applied some Clarity adjustments in the raw converter, the image still needs more punch. A good trick is to create another Black & White adjustment layer, and then change the Blending Mode to Hard Light (Soft Light or Overlay also works well) before reducing the Opacity to taste. In this case, the Opacity is 60%.

8 Define jacket

The nature of the jacket means there's still too much detail in some areas. The quickest way to get rid of this is to make a selection with the Polygonal Lasso tool, feather by 1px, invert it and then using the Brush tool set to Black, brush over the offending area.

9 Contrast and crop

Finishing touches see a Curves adjustment layer applied, with the shadow areas of the image darkened even further before cropping the image to remove the stray polyboards creeping into the edge of the frame.

The moment you enjoy full creative freedom.

The new ZEISS Loxia lenses.

// INSPIRATION
MADE BY ZEISS

The perfect bridge between classic photography and modern technology.

Our new, lightweight ZEISS Loxia 2/35 and ZEISS Loxia 2/50 lenses give you the best of both worlds: the fantastic creative possibilities only offered by manual focus, and the benefits of compact, modern full-frame sensor cameras from the Sony $\alpha 7$ Series. Let your creativity run free. And look forward to breathtaking images and videos.

AP STAFF CHOICES

This year saw some wonderful images from professionals and amateurs alike. Over the next ten pages, 12 members of the Amateur Photographer staff plus ten magazine, agency and website editors select their favourite shots

Oliver Atwell

Senior features writer

Condition #5 by Guia Besana

My image of the year comes from Guia Besana's series 'Under Pressure', a project that challenges our warped perspective of the 'ideal woman'.

While the discourse of feminism has helped us to gradually structure a reclassification of just what we mean when we use the word 'female', our notion of femininity is still placed firmly within a series of lazily assembled types, ones still perpetuated by film and literature. Here we find one such trope: the bride. The trope of the bride is a fleeting one. It's a stopgap

between two other ideals: the innocent virgin and the doting housewife.

The bride's body is concealed within a ritualistic uniform. It's cocoon-like, further highlighting the idea that, through the archaic ritual of marriage, this butterfly-tobe will be transmogrified from one trope to another. The bride aggressively thrusts a bouquet of flowers towards an unseen target. We all know the tradition of throwing the bouquet to the crowd. Here the bride is passing on the ritual of marriage as if her unseen target has no say in the matter. After all, isn't our expectation that all little girls grow up to get married, bare children and create a perfect home?

U Bein Bridge in Mandalay, Myanmar by Shuo Huang

On a sweltering day, Shuo Huang cycled along the U Bein Bridge in Myanmar, the sun setting behind him. Suddenly, he heard a deafening clap of thunder and within seconds the bridge was deluged with monsoon rain. The locals scurried for shelter, but as the bridge cleared he marvelled at a phenomenal light diffused by the rain transforming the landscape. He leaped off his bike to capture the moment and took this picture.

Forest Flver by Simon Phillpotts

I have seen thousands of images this year, and have been impressed by many. However, when I was forced to stop and think of one in particular the picture that came to mind is Simon Phillpotts' 'Forest Flyer', which was highly commended in the British Wildlife Photography Awards. In itself, the image is quite simple - a shot of a red squirrel jumping from one tree to another - but the angle and colours make it look like no other shot I can remember seeing.

The picture is taken from below with a fisheye lens and a dash of fill-in flash to illuminate the body of the squirrel perfectly, and freeze the action mid-flight. The technique is flawless, but it is the simplicity and humour of the image that brings a smile to my face. www.wilddales.co.uk

Paul Nuttall Online production editor **Christ the Redeemer** by Yasuyoshi Chiba

As a bit of a football fanatic, every four years I become fixated with the World Cup. I looked forward to this year's tournament with particular excitement as it was taking place in what some would say is the spiritual home of football - Brazil.

A football World Cup is a sports photographer's dream, with endless photographic opportunities in a wide variety

of locations up and down the land. As such, it's difficult to pick out a single standout image from the tournament. That said, this image captured by Getty photographer Yasuyoshi Chiba on the day of the World Cup final itself has that extra something special you look for in an image of the year. The combination of the ball-shaped full moon highlighting the Christ the Redeemer statue atop Corcovado mountain – itself lit in the national colours to celebrate the occasion – seems to encapsulate the month's festivities in a single shot.

Côte de Buttertubs by James Maloney

With one of the greatest sporting events passing almost in front of his doorstep, James Maloney didn't want to miss this unique opportunity – and I'm glad he didn't.

The enthusiasm and excitement that Yorkshire would host the opening stages of the Tour de France had been building significantly in the preceding weeks, but I don't think anyone would have fully appreciated the reception and crowds that would gather in their thousands in the Dales, turning the Buttertubs Pass (renamed Côte de Buttertubs for the event) into something that would shame some of the most popular climbs in the Alps.

James's shot sums it up perfectly for me. The tight crop has resulted in a strong composition, so it appears the peloton is somehow merging into the thronging crowds. The overall sense of drama that you get from the shot is hard to beat. It's almost as though a mini amphitheatre has been created to watch these riders torture themselves on climb gradients, some of which can be 25% in places.

News editor

Looking down Artillery Lane towards Artillery Passage by Charles Mathew

I have cheated a little with this image in that I've selected a photograph that was clearly not taken this year, but it has been featured in this year's news nonetheless.

This 1912 image of Spitalfields in London, by Charles Mathew, is a spontaneous, candid-style street shot taken in an era when it was common for many subjects to pose. However, the significance is actually in a blurry newspaper hoarding in the background. In their quest to pinpoint the date it was taken, researchers spotted the partially viewable word 'Titanic', leading them to conclude it must have been taken in the days after the *Titanic* hit an iceberg on 15 April 1912.

The way children are dressed in the photograph suggests it was captured during the Sabbath, the Jewish holy day. This simple, yet effective, piece of detective work implied it was taken on Saturday 20 April 1912.

Technical editor

Comet on 4 November by NavCam

Some photographers like to brag about how far out of their way they've gone to get a great shot. The European Space Agency probably went further.

I'm a landscape photographer at heart, and in a previous career I was a research scientist. My choice of standout image of the year reflects this.

At first glance it may look like an artfully chosen shot of a striking rocky outcrop with a star field beyond, but it's actually Comet 67P/Churyumov–Gerasimenko, and therefore taken more than 300

million miles away from the earth. It underlines a basic human urge that lies behind much of photography – when we go somewhere new, we want to make sense of it by taking a photo and sending it home.

For the technically minded, this is a mosaic of four frames from the Rosetta spacecraft's NAVCAM camera, each of 1-million-pixel resolution, which has been slightly rotated and cropped. This has turned it into a visually striking composition, which I suspect is no accident; scientists can be artists too. Basic record shots are all well and good, but pretty ones are better. To me, this is simply the most remarkable photograph of 2014.

Michael Topham

Deputy technical editor
Wildebeest Migration
by Chi Hung Cheung

My favourite image of the year was chosen from a stunning selection of shots that made up this year's Sony World Photography Award winners. The picture was captured by Chi Hung Cheung and depicts a heart-pounding scene of wildebeest migrating in Kenya across the torrents of a river. There are many elements to the scene that, in my eyes, make it the best wildlife image I've seen this year, but essentially it's all about the light and the timing of the shot that have made it what it is.

With strong backlighting, Chi Hung Cheung has successfully silhouetted his main subject while capturing the drama of the wildebeest launching themselves into the water. He has managed to record an impressive level of detail throughout, right down to capturing the water droplets in pin-sharp focus.

The first time I viewed the photograph, I spent some time studying it and taking it all in, but I do question how close a representation it is to the actual scene at the time of capture. I believe there's been some

post-production work that's helped create an image with such a wide dynamic range, although I don't find that this detracts from the image and instead enhances what any professional wildlife photographer would tell you is a

truly stunning shot. I'd love to have the opportunity to speak to Chi Hung Cheung about how he went about capturing it. It only seems to get better the more I look at it.

www.worldphoto.org

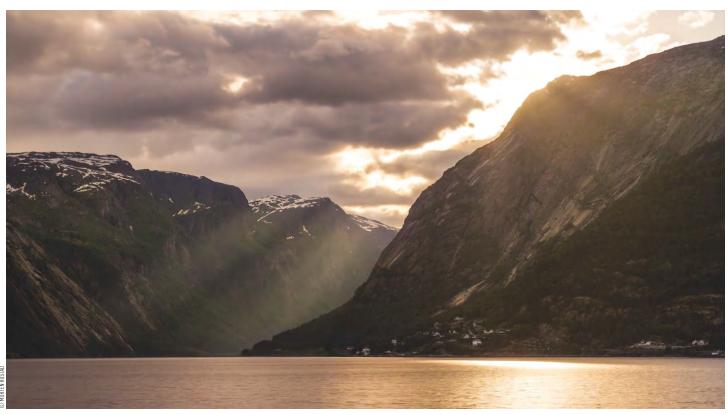

Nigel Atherton Editor Monkey Selfie by David Slater/a monkey

I have chosen as my image of the year a picture taken by a monkey. It's an outstanding image, and probably the best photo of a monkey I've ever seen. Even now, after viewing it dozens of times, it still makes me laugh. There's something about the expression; it's so human, as though it's fully aware of what it's doing and completely au fait with social media.

Yet the fact it was the macaque that released the shutter, instead of the photographer David Slater who provided the camera and set it all up, has led to a bitter legal dispute between Slater and that whole generation of internet evangelists (led, disappointingly, by Wikipedia) who are opposed to the concept of having to pay for content and would like the internet to be a copyright-free zone. They

claim that it's the monkey that owns the copyright, making the image effectively free to use without payment.

The likes of *National Geographic* have been using camera traps in wildlife photography for years. Photographers like Michael 'Nick' Nichols and Steve Winter have won numerous awards for their self-captured images of tigers and snow leopards. Is Wikipedia and its followers claiming that these images are copyright free too? Funnily enough, they've been strangely quiet about that. Could it have something to do with the fact that taking on the might of National Geographic and its team of lawyers would be much riskier than picking on a solo British photographer with limited power to fight back? It will be interesting to see how this case develops. www.djsphotography.co.uk

Callum McInerney-Riley

Technical writer

Norway - A Time-lapse Adventure by Morten Rustad

Over the past year I have seen so many inspirational images that it has been really difficult to pick just one. From the pages of *Amateur Photographer* to candid shots uploaded on Twitter, there have been

hundreds that have really impressed me – and on occasions made me a little envious. However, one piece of work by a young Essex-based photographer, Morton Rustad, had me captivated with his masterfully created time-lapse video taken in Norway.

Morton spent five months shooting in all of Norway's 19 counties, capturing everything from the deep fjords in the south-west, to the moon-like landscape in the north and the aurora

borealis. The video just gets better and better, and it's a truly outstanding piece of work.

I picked this single image from the set as it shows the light just peeking over the mountain. In the time-lapse video you see how the clouds move and the sunlight pours over the mountain and onto the lake below. I wholly recommend watching the whole video. It's beautiful.

www.rustadmedia.com. www.vimeo.com/107469289

Jon Stapley Staff writer Untitled by Hairul Azizi Harun

We often laud images for telling stories at AP, and here's a cracker. Hairul Azizi Harun won the Sony World Photography Awards' Split–Second category in the Open Competition, and it's difficult to see how anyone else could have come close.

The story in question is a tragicomedy in one act. It has been captured at the perfect moment – the mutual obliviousness of every

single person involved is what gives the image its humour. Neither the woman throwing the water nor the man with the camera has any idea what's about to happen, and we're viewing the last fraction of a second in which that state of affairs is true. Vitally, the fast shutter speed has frozen the moment into complete stillness. The image wouldn't work as well if we couldn't see exactly what was about to hit the unfortunate photographer in crisp detail.

The boy under the house to the right of frame, easily missed on first viewing, adds an extra layer of intrigue to the image. What's he doing under

there? We can't know. If you wanted to overuse an English degree you could mention how his surreal and wonderfully inexplicable mask makes him reminiscent of an archetypal mischievous spirit, like Ariel in *The Tempest*.

Hairul took this image in a village in Kuantan, Pahang, Malaysia. He says how his image narrates 'the pains and gains of being a photographer, the heritage of an old house, forgotten traditional games and the old generations meeting the new'. Can't argue with any of that. A thoroughly deserving winner! www.worldphoto.org

Andrew Sydenham

Studio manager

Le Visiteur by Horst Kistner

There is a lot of great imagery online and updates from the One Eyeland community (oneeyeland.com) regularly adorn my inbox. It was here a few months ago that Horst Kistner's 'Le Visiteur' caught my eye.

From a series of exquisitely crafted small room sets, the light through the window and wind-ruffled curtain delicately highlight the figure and the visiting butterfly. The quality of light gives this personal work from Kistner a high-end advertising feel. This slight contradiction is why it appeals to me so much, with elements of classic painting, concept art photography and commercial possibilities combined.

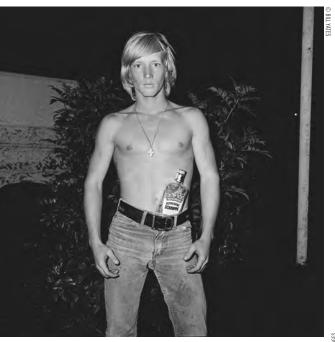

Kistner's work has recently been featured in the Germany photography magazine *Stem* and he is currently preparing for an exhibition in New York, in the USA, in early 2015. www.silent-cube.eu

Images of the year

PICTURE EDITORS' CHOICES

Ten magazine, agency and website editors select their favourite images from 2014

Aline Smithson

Editor of online magazine Lenscratch **Sweetheart Roller Skating Rink by Bill Yates**

Rather than choosing an image that was taken this year, I've decided to dig into the 2014 archives of Lenscratch and select one that appeared on my site this year. I've chosen Bill Yates' image from his series 'Sweetheart Roller Skating Rink', created in 1972–73. As I said, I featured the work on Lenscratch earlier this year, and after it appeared Bill was offered a museum show and gallery representation. Recently, I find myself drawn to older black & white work – it feels fresh again. Maybe that's because there is so much similarity to digital imagery or perhaps the past has become just as fascinating as the future.

Bill shot this image when he was starting out as a photographer and focused on a Roller Rink community in Florida, USA, returning night after night to capture the scene. I loved the bravado of this image, the subject's puffed-up chest and slightly clenched hands and the bottle tucked into his pants. You imagine that his life didn't go well and that night might have been the pinnacle of it. Who knows? That's what I love about it.

World War II Reenacted in Yorkshire

World War II Reenacted in Yorkshire Villages by Ian Forsyth

I was a bit hesitant to suggest this image at first. It's a quiet choice from a world of moving and impactful images, but it's one I like nonetheless.

lan Forsyth took this picture in October at the annual Pickering 1940s Wartime Weekend in North Yorkshire. I primarily edit archival photography, so this shot is both familiar and disconcerting in its attention to detail. There is a real stillness to the participants. It reminds me of a painting. We can't see their faces, but it's all there in the dress and stance. The subjects are perfect wartime archetypes. The crisp, light, clean composition, and the pop of yellow and red against the soft sludgy grey and khaki tones, aids the image's visual appeal. It has a graphic staged quality, but I like the artifice and nostalgia. It is a recreation, after all.

Giana Choroszewski

Operations manager at VII Photo Agency

Yazidi Woman by Ali Arkady

Of all the photographs I've seen this year, this image by Ali Arkady from the VII agency's Mentor Program has stuck with me the most. The VII Mentor Program is an initiative conceived by VII members, and seeks to provide professional development for new photographers who the

Rick Colls

Director of operations at Rex Features **Brazil's Defeat by Stefano Gnech**

My favourite image of 2014 is from the World Cup Finals, the year's biggest sporting event, during which the hosts Brazil were knocked out by the eventual winners Germany. Many outstanding frames arrived at Rex Features, but this one by Stefano Gnech for the Italian agency AGF is a perfect encapsulation of the tragedy of a sporting loss. It combines youth and age, innocence and experience, humour and sadness as a Brazil supporter desperately hangs on to the Jules Rimet trophy – and hope – in the game that ended in a 7–1 defeat for the home side.

www.corbisimages.com

Stephen Mayes

Executive director of the Tim Hetherington Trust

Self-portrait by David Uzochkwu

I was first exposed to David Uzochukwu's selfportraits while I was a judge at the 2014 EyeEm awards. David was awarded first prize.

I was struck by the visual intelligence and emotional intensity of his work, which gets stronger with every image I see from him. When I discovered that he's only 16 years old, I was blown away. David has found a way to portray adolescent angst – something I could never find a way to express creatively when I was his age. Even all these years later in my life, it's still cathartic to see these feelings expressed so evocatively. At a time when the selfie is often mocked and belittled, it's a powerful reminder to see how an intelligent self-portrait can dig deep to reveal so much about the person, and indeed about all of us.

www.daviduzochukwu.com

members consider to be the brightest new talents in the industry.

Ali Arkardy is a photojournalist from Khanaqin, Iraq. He is mentored on the program by VII photographer Ed Kashi. The powerful image we see here shows a Yazidi woman resting with her children in a camp in Zakho, Iraq, on 10 August 2014. As palpable as the pain, despair and exhaustion are in the mother's eyes, even more evident are the feelings of love, trust and safety in her lap.

www.viiphoto.com/ author/ali-arkady

Dr Michael Pritchard

Director-general at the Royal Photographic Society

Rubbish Pickers in Anlong Pi, Cambodia by Yap Kok Hing

At the Royal Photographic Society, we see stunning photography from both amateurs and professionals throughout the year.

A portfolio of work was recently submitted for a Society Fellowship by member Yap Kok Hing from Malaysia. For me, his entire panel of 20 images was exceptional, with great photography and excellent print quality as one would expect, plus a subject that was visually and emotionally challenging. The portfolio depicts the rubbish pickers in Anlong Pi, Cambodia,

about 25km from the tourist temples of Angkor, who scavenge waste for anything that can be recycled, putting their own health at risk for an income of a dollar a day.

Of all the images in Yap Kok Hing's portfolio, this one particularly caught my eye. The intensity of the girl's face staring directly into the camera, and the background of people and waste all combine to form a great composition and an image that conveys the greater story. It has stayed with me since I first saw it. www.rps.org

Nick Turpin

Founder of iN-PUBLIC street photography collective

Untitled by Sam Ferris

When you're shooting on the streets you can't make a street photograph happen in front of you, but if you're a good photographer you will know it when you see it.

Special moments stand out on the street, they stand out when editing and they stand out when viewing images online. That's what happened when I spotted this stunning image by Sam Ferris on a Flickr street photography group. Street

photography can be funny, sad, surreal, witty, tragic or, as in this case, just plain beautiful. The shot is a cityscape that also includes a wonderful moment, as the passing birds are perfectly placed and in a lovely line lit by the illuminated fog.

It demonstrates that not all great street photographs are made at street level. I can say for sure that I will certainly be looking up a bit more often.

www.500px.com/Ferriswhiskey

Magnum Editors' Choice

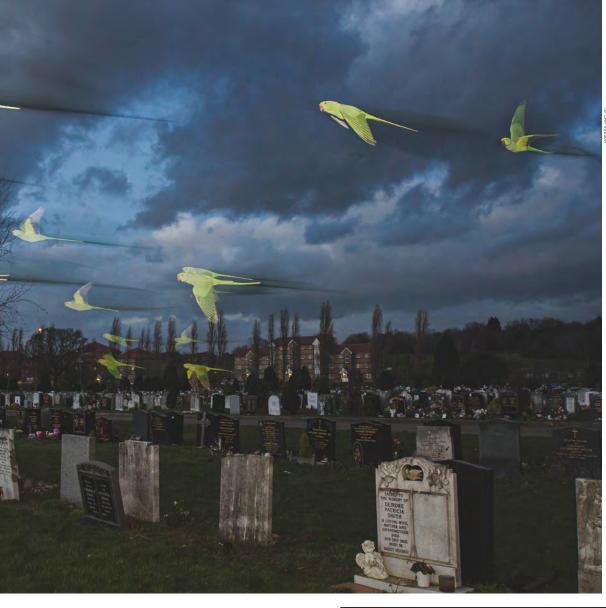

Magnum Agency

Ukraine, Kiev by Jerome Sessini

In his career, Jerome Sessini has covered many international current events, such as Palestine, Iraq (from 2003 to 2008), Aristide's fall in Haiti (2004), the conquest of Mogadishu by the Islamic militias and the war in Lebanon (2006). Here, Jerome found himself witnessing the recent troubles in Ukraine.

On 20 February, unidentified snipers opened fire on disarmed protesters as they were advancing on Instituska Street. According to an official source, 70 protesters were shot dead. Ukrainian riot police claimed that several policeman were wounded or shot dead by snipers as well. An unofficial source said that snipers opened fire on the police and protesters at the same time in order to provoke both camps.

www.magnumphotos.com

Matt Swaine Editor of *BBC* Wildlife Magazine

Rose-ringed Parakeets Flying Over a London Cemetery by Sam Hobson

I would like to nominate Sam Hobson's picture, which was a finalist in the 2014 Wildlife Photographer of the Year competition.

Sam specialises in urban wildlife and works hard to understand animal behaviour to get the right image. I believe this shot was taken in a graveyard in South London and it shows rose-ringed parakeets an alien species that is now becoming quite commonplace on garden feeders in this part of the UK. Invasive species are a serious issue, and this photo shows these birds in a clearly British setting, bringing home just how commonplace they have become.

www.samhobson.co.uk

Marc Jones

Art editor at *Uncut* magazine

Gruff Rhys by Andy Martin

My image of the year is a tintype portrait of Welsh musician Gruff Rhys, taken by Andy Martin at his studio in the East End of Sunderland, Tyne and Wear, on 6 September.

Andy took this shot while Gruff was touring his album *American Interior* – its songs are the result of a couple of years Gruff spent travelling the USA playing small shows and researching a distant ancestor of his called John Evans. Evans was an impoverished farmhand who left Wales in 1792, on a solitary search for the mythical Mandan tribe – Native Americans he believed to have descended from early Welsh settlers.

In his own way, Andy has also had to become something of a historian to achieve unique images like this. Using a technique originating in 1851, Andy's portraits are taken on a Mawson & Swan whole-plate camera, built in the late 1800s in Andy's home town of Sunderland. The camera is fitted with an 1860s Dallmeyer (petzval) lens, and loaded with a metal plate that has previously been coated in collodion and left in a bath of silver nitrate to make it light sensitive – it has an ISO of around 1! The photo has to be taken before the plate dries, then the image has to be developed, fixed and varnished to preserve it.

Andy's lens is often inches away from his subject's nose, which forces the sitter to drop their guard, abandon any kind of pose and for a few moments give their full concentration to the photographer. Andy's picture has an extremely shallow depth of field – here the shifting degrees of focus and deep shadows conjure up a striking, soulful portrait that is vivid and alive.

In 1948 Nikon's very first camera, the Nikon Model one was destined for only a brief production run. Its 24x32mm format proved unpopular with the GHQ of the Occupation Forces under General Macarthur, who would not allow the camera to be exported to the USA because the film format was not compatible with Kodachrome 35mm slide mounts. It was replaced by the Nikon M (the M standing for mutation – Latin

for change or alteration). The M used 24×34 mm format, but it was still smaller than the 24×34 mm format, but it was still smaller than the 24×34 mm format, but it was still smaller than the 24×34 mm format, but it was still smaller than the 24×34 mm format, but it was still smaller than the 24×34 mm format, but it was still smaller than the 24×34 mm format. 36mm employed by Leica. The camera (pictured) is marked "Made in Occupied Japan", a sign of the times following the 1845 Armistice. This very fine unsynched example is complete with a 5cm f/2 Nikkor HC lens, a leather ever-ready case, an instruction manual, a Nikon Accessories leaflet and the original maker's box. EXC.

Jim Marshall photographs Jerry Garcia of Grateful Dead in a Winterland dressing room, San Francisco, 1967

ROCK of 28

The late **Jim Marshall** shot many bands, as well as the flower power movement. **Amelia Davis**, his friend, assistant and archive owner, talks about him to **Tom Smallwood**

nyone with a passing interest in classic rock, soul, jazz or country music will know Jim Marshall's work, even if the name isn't that familiar in the UK. No, it's not Jim Marshall as in Marshall Guitar Amps, although our Jim certainly stood in front of plenty over the years. We're talking about the photographer Jim Marshall, a curmudgeonly but big-hearted genius with a coke habit who took so many iconic images in the 1960s and '70s that there is barely room to list them all here. Hendrix setting his guitar alight at the Monterey Festival, California, in '67; Johnny Cash flipping the bird during his gig at San Quentin State Prison in E California; The Beatles' American

tours; the cover of the Allman Brothers Band *At Fillmore East* album; Mick Jagger; Keith Richards; Janis Joplin... the list goes on.

Marshall was the rock photographer's photographer, helping to define the genre at a time when it was just seen as part of the record company's publicity machine. Several things made Marshall stand out: his passion for the music and commitment to photographic excellence, certainly, but there was also his ability to win the trust of artists - even notorious members of the awkward squad like Lennon and Dylan. Sadly, Marshall died in 2010, but a new collection of his images of San Francisco's hippy mecca, Haight-Ashbury, has just been published. The Haight: Love,

DRAF

Rock, and Revolution, is a fascinating chronicle of the Summer of Love of 1967 and '60s counterculture, with plenty of shots of 'ordinary' Haight-Ashbury inhabitants alongside portraits of local luminaries like rock band Jefferson Airplane and poet Allen Ginsberg. Jim's life was equally colourful, as Amelia Davis, his personal assistant and confidante, recalls.

Jazz hand

'Jim had always been intrigued by cameras, ever since a guy photographed him during a track meet at school,' Amelia explains. 'When he was discharged from the air force in 1958, he bought his first Leica, which cost him a fortune.'

If Jim was talented, he was also lucky enough to be in the right place at the right time. 'Jim was living in North Beach, San Francisco, which was a real hot spot in the late '50s,' adds Amelia. 'You had the poets of the Beat Generation, the City Lights Bookstore, the jazz clubs...

Jazz was Jim's first passion and he would take his camera around with him all the time.'

Through Jim's love of jazz came his fateful meeting with John Coltrane [the American Jazz saxophonist and composer]. 'When Jim first met Coltrane in 1960, Coltrane was trying to figure out how to get to Berkeley to meet the jazz critic Ralph Gleason. Jim offered to take Coltrane over, and he was the only photographer there during the meeting. He got some wonderful images of a pensive Coltrane, and they become iconic.' The rest is history.

In 1962, Jim moved to New York City and shot album covers for Atlantic, Columbia and ABC-Paramount, as well as a feature on jazz pianist and composer Thelonious Monk for *The Saturday Evening Post*. In 1964, he covered the Newport Folk Festival, Rhode Island, before moving back to San Francisco, where his career really took off. Jim shot The Beatles' final concert at Candlestick Park, San Francisco, in 1966, while 1967 saw the Monterey Pop Festival and the Summer of Love. In '68, Jim was with Johnny Cash live at Folsom State Prison, California; in '69 it was Woodstock, New York; '72 saw him touring the US with The Stones, and so on.

Access all areas

So what was it about this gruff and rather uncharismatic-looking man that got rock and jazz legends to let their guard down and allow him to shoot away in the background?

'Jim befriended them,' Amelia explains. 'They forgot he was there, and his camera was always there. Jim was very proud that an artist or manager had never complained about him. He never released a compromising image or did anything behind their back.'

Despite this ability to get along with some pretty big egos, Jim was uncompromising in his demands, and wasn't afraid to take on record companies and managers. 'It was either full access or nothing,' Amelia adds. 'He was very clear about how

The Beatles coming on to the stage at Candlestick Park, San Francisco, 29 August 1966 Jim Marshall with American singer/ songwriter Janis Joplin

'Jim was very proud that an artist or manager had never complained about him'

he worked, and if the management didn't like it, or tried to intervene in a shoot, he'd get up and leave. It was about full access and full control, not about the money.'

As part of this full access, Jim was happy to enter the artists' inner circle, joining in with a lot of the backstage excesses of the time. 'Sure, Jim would party afterwards, but he was never high when working,' says Amelia. 'He did become a cocaine addict though, and would pull a cotton bud through his collapsed septum as a party trick. Jim fondly looked back on the time he was covering the West Coast leg of the Stones' US tour in 1972. He called it the Stones' touring party...'

Cash in the antic

Sex, drugs and rock and roll aside, Jim was also living in San Francisco during the height of flower power and documented the scene unfolding on his doorstep. 'He was just curious, and although he knew something was going on, he probably didn't realise its full cultural significance,' Amelia explains. 'However, he was very much a historian with a camera. Jim originally wanted to get a book of his Haight-Ashbury images published in 1976, and worked with a writer called John Poppy on mock-ups. It was too soon after the '60s, though, so it never got published. In fact, we tracked John down and he wrote the afterword for the new book.

Of all the bands from that era, Jim probably had the strongest connection to Jefferson Airplane, reckons Amelia. 'He was good friends with [Jefferson Airplane's] Grace Slick and Jourma [Kaukonen], and in many ways Grace was a female Jim,' she says. 'Jim also had a strong bond with Janis Joplin and recorded her highs and lows. He used to say, "Janis was not the prettiest chick, but she loved the camera".'

Jim was also friends with Johnny Cash, and was the catalyst for one of the most famous photographs of the Man in Black. 'Cash pushed for prison reform, as he was a believer that people deserved a quality of life, no matter what they'd done,' says Amelia. 'So Jim accompanied Johnny to his famous awareness-raising gigs at Folsom and San Quentin [State Prisons]. During a rehearsal, Jim turned to Johnny and said, "Let's do one for the warden." So Johnny gave him the finger.'

Although he will be forever associated with the golden age of jazz and rock, Jim hated being pigeonholed, and was something of a frustrated documentary photographer. Amelia explains how he idolised the great Magnum documentary photographers, like Capa and Cartier-Bresson. Indeed, some of his most cherished images, which he called 'his children', don't involve music at all.

'Back in 1963, Jim embedded himself in a coal-mining town in Hazard, Kentucky,' Amelia explains. 'There was so much poverty and people were sleeping in cardboard boxes. He ended up working with a writer on the project, but he abandoned it as he hated the way the writer made the locals look like pathetic victims. Instead, he took his images to the

JIM'S LEGACY

ALTHOUGH Jim is no longer around, Amelia reckons he would have passed on the following tips.

- Be true to yourself. Shoot what you think is important and make it your own.
- Capture the moment, but don't just click away.
 Jim never cropped and never shot digitally, so this forced him to become a master of composition.
- Jim thought digital cameras made photographers lazy. So don't use technology to compensate for poor technique.

magazine of the Roman Catholic Archdiocese of New York. A few years later another photographer covered the same story for *Time* magazine and got an award for it. Jim shrugged it off, but always felt the award should have been his. Music became Jim's bread and butter, and it become hard for him to break away from it. He had a sensitive side and hated rejection.'

Supporting the brotherhood

Music changed a lot as the '70s wore on, and punk and new wave weren't really Jim's scene. 'He was more old school, and was more into sappy country music than punk,' laughs Amelia. 'Also, the music industry was changing. With Jim, it was all access

or nothing, and suddenly there were handlers and PR people everywhere. It all got very controlled, and Jim would just rather not do it.' Towards the end of the century, the '60s were no longer a dirty word and interest in Jim's work started to rise again.

In the late '90s, Jim was selling his work in galleries and he didn't have to shoot any more. He was quite happy just to be able to pay the rent and own a car. So long as he had his Scotch, he was content. It had been tough before that. Even in the '60s, he was not being paid a lot.'

A new generation of bands and artists also came along – people with a keen sense of rock history who wanted to be shot by Jim. John Meyer, Lenny Kravitz, and Slash in Jimi Hendrix (with Super 8 camera) filming Janis Joplin backstage at Winterland, San Francisco, 1968

Below left: Grateful Dead, last free concert on Haight Street, San Francisco, 1968 particular,' says Amelia. 'Jim ended up on stage shooting rock group Velvet Revolver while all the other photographers were down in the pit. It was total access or nothing.'

Despite his assertive manner and formidable reputation, Jim always had time for other photographers, and would try to help them as much as he could. 'Advice, contacts – he saw it as a brotherhood,' says Amelia. 'Young photographers would call him and ask if he would review their portfolio. He'd agree, and even if the work was rubbish, he would find something nice to say, like, "Hey, you're really good at crowd shots."

Haight of fame

WORKING on *The Haight: Love, Rock and Revolution* has been a labour of love for Amelia and the rest of the publication team, but a labour nonetheless. 'There was something like 180,000 images and 3,000 proof sheets to work through,' she explains. 'It was like a delightful

historical dig and I felt like an archaeologist. I also got a real sense of just how good a photographer Jim was. He would circle a "hero" shot, but there would be five or six other really great ones from the same shoot too. He'd compose quickly in his viewfinder and just nail it.'

The Haight: Love, Rock and Revolution is available now from Amazon, priced £35, and other booksellers, with a preface by Donovan and text by Joel Selvin. ISBN 978-1-60887-3-630.

Where in the Company of the Company

If you haven't decided where to head on your holiday next year, let some of the UK's leading photography tour leaders help you. From Skye to Route 66, there's something for everyone

Isle of Skye Steve Gosling

Steve Gosling
The Is

The Isle of Skye is a wonderfully picturesque island off the west coast of Scotland, and was voted the fourth best island in the world by *National Geographic Traveler*. It's a place of extremes – from the craggy outline of the Cuillin

that dominate the landscape to the imposing headlands that descend to peaceful bays and beaches. Its changing weather patterns can create wonderfully atmospheric lighting conditions for photography. In winter, the weather can be as dramatic as the landscape, with the possibility of cold and clear days as well as wind-blown stormy clouds filling the skies – it's my favourite time to visit.

Steve Gosling is running a winter workshop on Skye in 2015. Visit www.stevegoslingphotography.co.uk/workshops-peter-cox.htm

on taking
photographs.

Iceland is an incredible country and the beach near Jökulsárlón glacier lagoon is a photographer's paradise.

Where else might you see a black-sand beach littered with icebergs? These calve from the glacier edge, drift out to sea and are then washed up on the beach, where they are battered by waves. The colours are incredible – milky white or bright blue. In the right light, they are breathtaking.

Many people come to Iceland to see the northern lights. As spectacular as they are, nothing really compares to this ice beach.

TIP

When the light hits them from the right angle, some of the icebergs seem to glow from within. Use a 2-3sec shutter speed as the waves wash back out to sea to create some foreground interpret

Rhodope Mountains, Greece George Blonsky

Or Rh

One of my favourite places has to be the central Rhodope Mountains of northern Greece. Dense forests blanket the Greek-Bulgarian border mountains, where bears, chamois, red and roe deer, wild boar, wolves

and wildcats roam. Almost impenetrable forest means that many areas remain unexplored. For owl lovers, the forests hold eagle owls, Tengmalm's owls and the sole population of pygmy owls in Greece. Nine out of the ten European woodpecker species are resident. Other breeding species include capercaillie, black stork, golden eagle and Egyptian vulture, all set in a landscape so beautiful as to leave you breathless. **Visit www.photographyworkshops.eu**

June is probably the best time to visit as spring will be in full swing, with birds, mammals and insects at their most active. Give yourself plenty of time to really explore the area.

Myanmar Phil Malpas

My first visit to Myanmar (formerly Burma) was in February of this year. I was enchanted by the combination of breathtaking and unspoiled natural landscapes and the calm

serenity of its people. I immersed myself in the mystery of its history and religion, which is embodied in marvellous ancient cities and literally thousands of old pagodas and magnificent temples. Most of all, I found my camera drawn to the people of this remarkable country, who always offer spontaneous smiles and immediate trusting and generous friendship. I can't wait to return next year when, instead of photographing my Light & Land clients sailing past in a balloon over Bagan, I intend to join them for my first–ever flight!

Visit www.lightandland.co.uk

Get a good local guide who can overcome the language barrier and allow you to communicate properly with local people, thereby making your subjects feel relaxed and even amused by your presence.

Route 66, USA David Ward

I'm fascinated by the rise and fall of the American Dream, as epitomised by the once-thriving small towns that are now dying all along Route 66, the Mother Road. Amid

many melancholic sights, it's impossible not to have one's spirits lifted by the sheer optimistic madness of the neon-encrusted Blue Swallow Motel in Tucumcari, New Mexico. Making an image here at dusk is like stepping back in time – a huge gas-guzzler on the forecourt, the 'Office' sign in glowing neon and the cars passing west, towards the Promised Land. The air is full of the fading echoes of rock 'n' roll... For me, these signifiers of an earlier innocence make for a very evocative image.

Visit www.into-the-light.com/workshops

The neons look their best in the crossover light, and they're switched off in the morning, so shoot for an hour either side of sunset. If you stay at the Blue Swallow, they will even provide an old car for the photo.

Bosque del Apache, New Mexico Mark Sisson

1

My best work always comes when I am in a location for a good period of time. Bosque del Apache in the USA allows just this

approach, with sunrise and the build—up to sunset being key periods in terms of both light quality and behaviour for the thousands of snow geese and sandhill cranes that winter here. Every day offers something slightly different (always dramatic, though), and your confidence with what's likely to happen encourages you to explore greater variety and creativity. As a result, you can get a truly diverse yet focused portfolio — just what you want from a photographic trip.

This is a great place to experiment: wideangles for the drama of the location, silhouettes at sunrise/sunset and slower shutter speeds for blurred effects of bird movement are among the many options.

The Lofoten Islands Paul Gallagher

The Lofoten Islands are situated on the west coast of northern Norway, just inside the Arctic Circle. They feel remote, and although the winters are as cold as you would expect, they make for spectacular landscape photography. Because it is a long, narrow archipelago, you are in constant

contact with the rugged coastline, with its spectacular snow-capped mountains that rise out of the fjords. The low winter light (when you can see it between the blizzards) and the constant transient weather are perfect for landscape photography. Breathtaking scenery is around every corner, offering a wealth of compositional opportunities. It's a location I know I will return to year after year. **Visit www.aspect2i.co.uk**

TIP

Take ice spikes for your boots. They allow you to work freely, with the assurance that you won't end up on your bottom at any moment!

St Michael's Mount, Cornwall Ross Hoddinott

St Michael's Mount is one of Cornwall's most recognisable and photogenic landmarks, and when we run workshops there, it's the one place every photographer wants

South Luangwa Valley, Zambia

Janette Hill

The South Luangwa Valley in Zambia is one of the greatest wildlife sanctuaries in the world, with an intense concentration of animals

around the Luangwa River and its oxbow lagoons. It is a great safari destination, with many small, privately owned camps in remote locations. For a wildlife photographer, it is difficult to find a better location. You can use vehicles and also have walking safaris, which enable you to get up close and personal with the flora and fauna. There are more than 60 species of animal and over 400 species of birdlife, and the park is famed

Visit www.naturalwondersphotography.co.uk

for its leopard population.

Be sure to look all around you. There's so much going on, you may miss something extraordinary that's happening behind you.

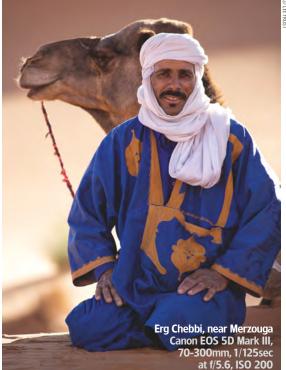

to shoot. At dawn, the beach is often tranquil, other than the sound of oystercatchers and gulls. The old causeway is constructed from colourful stone, which neatly directs the eye toward the Mount. It's a location you can shoot well at any tide and at either end of the day. At low tide, there are often wavy patterns on the beach and also rock pools, which provide alternative foreground options.

Visit www.dawn2duskphotography.co.uk

TIP

Wear wellies! The causeway is best shot when the waves are lapping over it, so wellingtons are handy for avoiding wet feet.

Morocco Lee Frost

I first visited Morocco almost 20 years ago and have been back more than a dozen times since, travelling the length and breadth of the country by car, bus, motorbike and came!

I love the colour and character, the hustle and bustle. At times it's like stepping onto the set of the next Indiana Jones movie, complete with eccentric extras! Marrakesh is my favourite city, but after a few days immersed in its chaos I like to head for the mountains where the air is cool and the people are friendly, then from there the desert beckons – vivid orange sand dunes that go on for miles and skies so full of stars there's no room for black.

Visit www.photoadventures.co.uk

In the cities you need a good guide to show you around. The souks are like a maze.

Christmas Projects

We have plenty of fantastic ideas for you to try at home over the festive period

GARDEN WILDLIFE

CANDLELIGHT PORTRAITS

TURN SUMMER INTO WINTER

CHRISTMAS FOOD

CHRISTMAS BOKEH

Make complicated studio lighting set-ups a thing of the past with this simple technique, says Phil Hall. All you need is a few candles and a fast lens

t can be rather challenging to work with, but the warm glow of candlelight can produce soft, atmospheric, low-key portraits. With the shorter days, potentially plenty of candles dotted around the house over the festive period and a host of willing subjects, Christmas is the perfect time to try this technique. Here's what you need to consider.

1 Lighting

As with any light source, the positioning of your candles will affect how your subject is illuminated. A single candle, or two or three grouped tightly together and close to your subject, will produce stronger shadows than if they are spread out and further away from your sitter.

While you might just want to have a single candle in the shot, there's no harm in having a few more out of frame burning away to really boost that warm glow.

With the candles set up, the rest of the room should be left in total darkness. Switch off lights in adjoining rooms, too, as these may interfere with your shot.

2 Bounce light

With minimal light levels, don't be afraid to bring out a reflector and try to reflect what little light you have at your disposal back onto your subject.

3 Lens choice

It goes without saying that you're going to be working in minimal light. While you can try shooting with a variable and slow maximum aperture zoom lens, life will be much easier if you reach for a fast prime. An affordable 35mm or 50mm f/1.8 is perfect for this, as it will not only let you work at lower ISOs, but also your viewfinder will be that bit brighter. A fast telephoto zoom such as a 70-200mm f/2.8 is also a good candidate, although its use will depend on the working distance in the room.

4 Use a tripod

Even if you're pretty confident handholding in low-light conditions, it's worth popping your gear on a tripod to rule out the risk of camera shake. If you have one, a remote release is recommended, so when you fire the shutter you don't inadvertently nudge the camera.

5 Exposure

Shooting in aperture priority, you'll ideally want to be close to or at your lens's maximum aperture. If you're using a prime, that should be around f/1.8. With that done, you now need to dial in your ISO – a good starting point is around ISO 800. You want to aim for a shutter speed of 1/60sec or faster. While you may have your camera firmly on a tripod, there's still the risk that your subject might move ever so slightly, so you'll want to use a shutter speed that's as fast as possible.

An affordable 35mm or 50mm f/1.8 prime lens is perfect for this technique'

6 White balance

If you shoot in auto white balance, your camera will try to neutralise the warm glow from the candlelight, removing all that atmospheric warmth you've worked so hard to achieve. Instead, try setting your camera to tungsten to retain the original mood of the shot – working in raw will allow you to fine–tune this later in post–production.

7 Metering

If there are candles in your shot, your camera may attempt to overexpose the scene. Review your image and, if it's too light, deliberately underexpose the shot with exposure compensation or swap to manual mode for complete control.

8 Avoid draughts

When shoot a candlelight portrait, try to find somewhere in the house that isn't susceptible to draughts as they can easily make your candles flicker and ruin your shot.

9 Try firelight

Open fires offer fantastic opportunities if you have one in your house – alternatively, it's a good excuse to pop to your local pub, where one may be roaring away – with their warm light offering similar atmospheric shots.

10 Safety first

It goes without saying, but working with naked flames in the dark does have its dangers. Use common sense and be aware of your surroundings, be careful with your props and have something to hand to extinguish the flame in the event of an accident.

Wildlife through your window

Have you always wanted your own nature reserve? The truth is, you may already have one, as gardens provide a welcome oasis for birds, especially at Christmas. Luke Massey explains

Fieldfares start arriving in the UK in October, with numbers building as the winter progresses

s winter draws in, your garden becomes an attractive feeding stop for birds, with numbers boosted by visitors from the Continent. It may even attract a few exotic guests, too, such as canary-like siskins and dainty redpolls. Winter thrushes arrive in autumn, and,

as redwings migrate under the cover of darkness, listen out at night for their faint 'seeeep-

With all these new additions, you've more reason than ever to head out into the garden over the Christmas period and set yourself up for some doorstep photographic opportunities.

Approach

seeeeep' call.

The bonus of photographing in your garden is that the sight of a

human shouldn't alarm the birdlife too much. In winter, birds will be hungry as food is sparse, so if you provide a reliable source they'll keep coming back. With a large variety of bird food on the market, choosing the best type may be difficult. However, remember that it isn't just food you should offer – water is just as important.

Food types

Niger seed: These small black seeds are almost irresistible to small finches such as goldfinches, siskins and redpolls.

Fruit: Pick up a bag of apples in the supermarket and throw them on your lawn – winter thrushes love them.

Fat balls: These are rich in fat

CHRISTMAS PROJECTS Technique

and provide a high-energy feast for your garden birds. Make sure you remove them from their net bags and place them in a feeder.

Mixed seed: This is the cheapest option and should bring in the flocks.

Peanuts: The classic bird

Peanuts: The classic bird food. You can buy them chopped or whole, and woodpeckers love them.

Positioning the food

Try to place your feeding station where it can be photographed easily. Mine is situated close enough to my shed so I can use it as a hide by opening one of the windows. For low-level shots, I use my sliding patio doors. I can lie in the warmth of my house and poke my lens through the gap. A

chair hide is another good option – you can leave it near the feeders and the birds will quickly get used to it.

Aesthetics

What puts a lot of people off photographing birds in the garden is the difficulty getting a clean shot. Backgrounds are massively important, as a straggly mess of twigs or fence panels behind your feeders will be either dull or distracting. Try to get something with even coverage - an ivy-covered fence panel a few metres back will blur beautifully if you shoot wide open. The further your background is from your photography site, the softer it will be.

Perches can make an

Technique christmas projects

image. You can have the dullest, smoothest hazel branch that will add nothing, or you can have a gnarled, lichen-covered branch that will provide colour and texture.

One trick I use is to replace the perches on a feeder with natural ones by simply inserting branches into the holes. The birds land on the natural perches and, if framed correctly, your viewers will not realise it is part of a feeder.

If it snows, I like to scatter apples and seed on the lawn. Overexpose the snow for a striking high-key image that will capture birds such as winter thrushes and finches in all their glory.

Behaviour

If you're offering food, you'll have more birds in the garden than normal, and this will increase competition around the feeders.

Greenfinches and goldfinches, two of our most exotic garden birds, will bicker with each other for food.

Chaffinches seem to have a phobia of landing on perches, although this is perfect for the wildlife photographer. They'll hover like hummingbirds before snatching a seed from the feeder. Use fast shutter speeds to freeze the wings or go a little slower to get some motion blur.

With a steady stream of birds to your garden, predators won't be far away. If you're lucky – and the smaller birds are unlucky – a sparrowhawk may pay your garden a visit. Keep an eye out, and if they leave the kill behind they will probably return.

Now you know how to attract the birds, where to hide yourself and what to expect, the next step is easy – simply set up your feeding station and begin your winter project.

Let it snow

If you don't have a winter scene suitable for a Christmas card, fear not, as **Andrew Sydenham** reveals how you can fake it in a few simple steps

The picture was shot in the middle of summer, but with a few simple steps we can turn it into a winter scene

hen snow and ice hit this country, it's seldom for very long – in fact, often, if you blink you'll miss it. The problem with finding a suitable picture for a Christmas card, or in fulfilling a client's request for a wintry scene, is that you really need to think about the subject and shoot it long before the pictures are required – usually in the middle of summer, when the budget will hardly fly you off to an Alpine glacier. All is not lost, though, as fortunately there's a simple solution in the Photoshop Channels and Layers palettes.

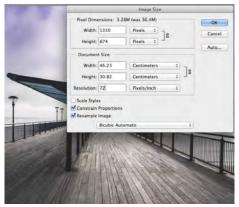

To convert a summer picture to a winter scene and give it a chilly look is not a complicated procedure, but the secret to success lies in your choice of image. The technique can work extremely effectively with one scene, but have little visual impact on another. I had to experiment with a number of images before I found one that worked for me. I discovered that important criteria include features such as railings or tree branches, with highlight and shadow areas that show up the snow effect clearly. My image of Boscombe Pier in Dorset (left) had the qualities I was looking for.

HOW TO CREATE THE EFFECT

Software needed

To recreate this winter transformation, we've used Photoshop, but you should also be able to transfer these steps to follow the tutorial in Photoshop Elements and other image-editing programs to achieve a similar look to our version.

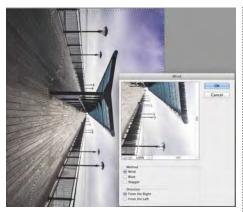

1 Resize image

Open your image and, in the Image Image Size menu, change the resolution to 72ppi. Check the Constrain Proportions and Resample Image boxes. This stage is important for the snowflake size later. If the resolution is too fine, the snowflakes will appear too small.

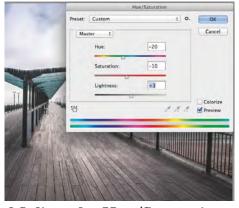

2 Rotate and select

In the Image>Image Rotation menu, rotate the image 90° clockwise (CW). With the Lasso tool, I made a rough selection of the sky and upper deck area, avoiding the foreground with the decking bolts and fixings, which don't look good with the ice effect.

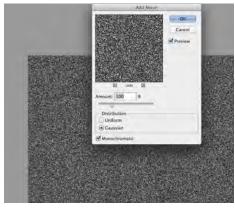

3 Add the icicle effect

Go to Filter>Stylize>Wind. Select Wind as your method and check direction From the right. Click OK and a fairly subtle ice effect is dragged down from the linear edges in the picture. Next, rotate the image back 90° CCW.

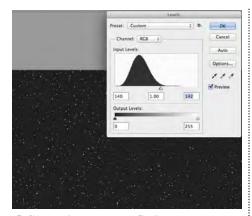

4 Adjust the Hue/Saturation

Pull up the Hue/Saturation palette from the Layers box and make adjustments to suit the wintry feel you are seeking to create. In this case, the settings are Hue -20, Saturation -10 and Lightness +3.

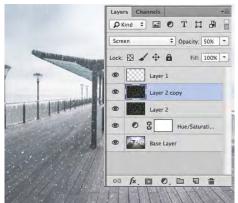

5 Create snow

Create a new layer and fill with black. In the Filter menu, select Noise>Add Noise, then select 100% Gaussian and check the Monochromatic box. Return to the Filter menu and select Blur>Gaussian Blur and set the Radius to 1.0 pixels.

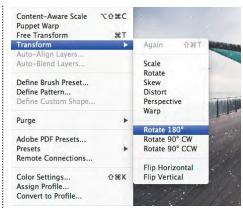

6 Size the snowflakes

Open the Levels window and set the Input Levels sliders to 140 lower and 142 higher. This creates an even distribution of snowflakes. Next, go to Filter>Blur>Gaussian Blur and set the Radius slider to 0.5 pixels.

7 Blend the snow

In the layers panel, change the Blending Mode to Screen.

8 Increase the snow

To change the direction and intensity of the snow and add a little more, make a copy layer and go to Edit>Transform>Rotate 180°. Reduce the Opacity to 50% and winter is finally with us.

Shoot first eat later

Before you serve up the turkey and Brussels sprouts, why not take a picture of it? Food photographer **Jen Rich** explains how to make your Christmas fare more photogenic

hether you've slaved over a hot stove yourself and produced an appetising treat or you've let the shops take the strain, you'll find yourself with an abundance of tasty food on offer over this festive period.

Everything from mince pies to a

celebratory glass of champagne or even Christmas dinner itself can make a fantastic photographic subject. Here's how you can end up with images that could grace the pages of a cookbook or glossy Sunday magazine, rather than those unappealing and faded shots that accompany the dodgy menu at your local kebab shop.

1 Shoot in daylight

You don't need a lot of space – a nice bright window will be fine. Use a reflector, black or white card or even tin foil to bounce light into shadows, or flag off areas of the image to balance the light as you need.

2 Use a tripod

Using a tripod will make composing and styling your shot a lot easier, as you can make small changes to the scene. For example, you can brush a little oil onto meat to freshen it up or wipe a drip of sauce without disrupting your framing. Working with a tripod also means you can use longer exposure times in dull winter light without the risk of blurring.

3 Study the food

Decide if there is a particular element or quality that you want to highlight and see what angle it looks best from. Choose whether to shoot the whole dish or if a single serving would be better. For example, a trifle is best kept whole, but an iced cake could benefit from having a slice taken out to show the inside.

4 Consider your background

When setting up your shot, a relatively plain background is always a good place to start. Think about the colours in the food you are shooting – don't choose a background that will clash with the food, or one that's so similar that the dish blends into it.

5 Drizzle, don't pour

If you are serving a sauce with the food, try pouring a little onto the plate and just a drizzle over the food. A plate drowning in gravy won't translate well to the camera.

6 Tell a story

Use props to set the scene and tell a story in the image. A serving spoon wedged into a big bowl of roast potatoes can make the viewer want to dive in and serve some up, or a sieve of icing sugar placed at the side of a shot of some dusted mince pies gives a home–made feeling. Try to only use props that are used in the preparation or serving of the dish. You may have a lovely vintage grater that you really want to include in your picture, but if you didn't use it to make the dish, save it for another image.

7 Build the dish

Pay close attention to the way you plate up your food. Placing carrots onto the plate one by one may not be how you would normally serve your veg, but it will help you to build the image and select only the best items to shoot. Keep an eye on your portion sizes, too – a smaller serving generally looks better than a plate piled high.

8 Backlight drinks

When photographing drinks, it is often best to backlight them, allowing light to shine through. This will make the liquid appear transparent and highlight any visual interest within the

drink itself, such as ice cubes, garnishes and condensation on the glass.

9 Dilute drinks

Drinks often appear darker in a photograph, so watering them down can help to restore colour and detail, especially with red wine. Tea and coffee should also be made milkier than usual for the same reason.

10 Bring back bubbles

Champagne and other fizzy drinks can look great on camera, especially when backlit, but if you find that your bubbly is looking a little flat, a pinch of caster sugar will liven it up and bring your bubbles back.

Winter won

Your garden may be awash with colour in summer, but winter can reveal a more subtle beauty that's equally satisfying to photograph. **Clive Nichols** explains

here's beauty in every season, and I love photographing gardens in the winter. Admittedly, the cold weather, combined with the fact that most of the flowers and foliage have gone, can be uninviting. However, unless you're a fair-weather photographer, it's well worth venturing out on winter days as the season offers many photographic opportunities.

The soft, low-contrast light we get on overcast days may not be dramatic, but it gives good, accurate colour rendition. On clear, cold winter days we get crisp and relatively low-angled sunlight, which is great for backlighting subjects and emphasising texture. Also, as sunrise comes much later in the morning, you don't have to get up at an unearthly hour for the early light.

The vivid colours of summer are replaced by the more pastel shades of winter, but I enjoy working with such a muted colour range. I also relish the opportunity to shoot using frost, snow and mist, as each of those weather conditions brings a distinctive atmosphere and offers a fresh perspective on familiar subjects.

If you feel your own garden is offering little inspiration, try exploring any local public gardens that are open in the winter. Formal gardens look wonderful when shrouded in mist, encrusted with frost or dusted with snow.

The following pictures are my own personal take on some of the aspects of winter garden photography. I hope they give some ideas for you to explore in your own work at this time of year.

Even a light dusting of snow transforms gardens completely and I always shoot as much as I can in snowy conditions. Snow emphasises the shapes in features such as box hedges in formal gardens. It also makes pale colours - such as those in the house and foreground path in this picture - stand out against the almost monochrome surroundings. If you're shooting snow scenes in bright sunlight, always bear in mind that camera lightmeters can be fooled into underexposing, so you should overexpose slightly to compensate.

Morning mist

The muted light we get on misty mornings lends subjects a mysterious, almost ethereal quality. In this case, it adds a special atmosphere to this grove of birch trees, which I photographed at Anglesey Abbey in Cambridgeshire. The ghostly trees, which seem to have eyes, have been scrubbed to look pristine. I chose to fill the frame with them and used f/16 on my 70-200mm zoom to keep as many in focus as possible.

erlands

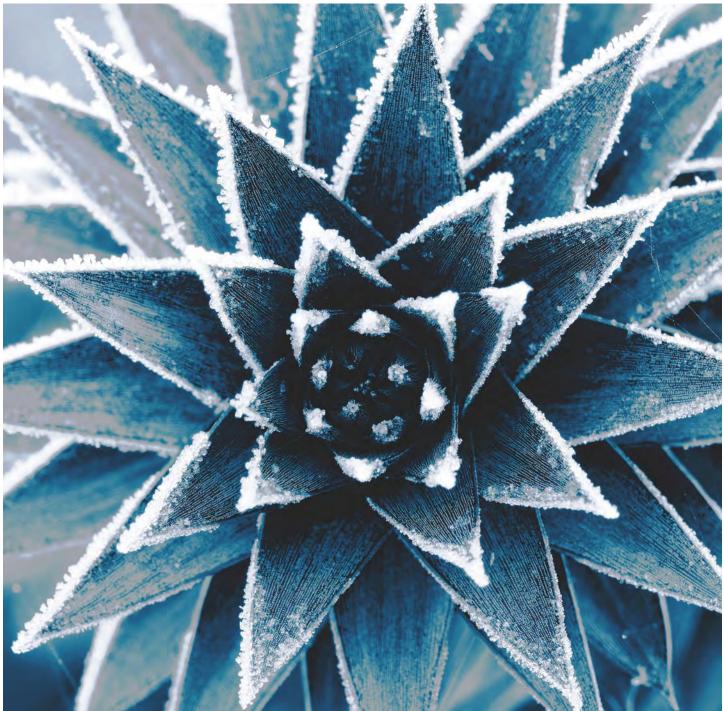

Frost

Frost is great for both wider garden scenes and close-ups of individual plants. In the case of this macro shot of an *Araucaria araucana* – or monkey puzzle tree – frost has isolated and accentuated its spiky shapes. I chose to focus on this section to emphasise the symmetry of the shapes, while using f/16 on my 180mm macro lens to give as much depth of field as possible. At the post-capture stage, I took out the original colour, then duotoned the image to give it a cool, almost metallic appearance.

Late-afternoon light Some shrubs, such as cornus, are

Some shrubs, such as cornus, are grown for their rich winter colours, and warm, late-afternoon light is ideal for emphasising their red, orange and brown hues. I photographed these stems at the RHS Garden at Wisley in Surrey, in January. Instead of shooting a wider scene, I used the long end of my 70–200mm zoom to select a small area where the colour was most concentrated. The curve of the bank, plus the reflected colour in the water, make an attractive composition.

Winter flowers

Snowdrops start appearing in January and make great subjects, either indoors as a still-life subject or in the field. When photographing them in groups, I like to use a shallow depth of field and pick out one or two for sharp focus, while blurring others in the foreground and background. To shoot these, I put my coat on the ground and lay on it, looking in the direction of the sun. As the snowdrops were strongly backlit, I overexposed by a couple of stops.

Garden features

If you have the opportunity to shoot in a historic garden, look out for any unique architectural features that are transformed by the winter conditions. Details such as this sundial, shot in Wollerton Old Hall Garden in Shropshire, can make great pictures. Here, the thick layer of frost combines with the patina of age on the sundial. I shot it very simply by looking down on it with a wideangle lens. The patch of low winter sunlight on the grass behind adds another attractive dimension to the picture.

Low-angled sunlight

On a clear winter's day, you can shoot in low, raking sunlight at around 8am instead of 5am in the summer. It's great for backlighting garden subjects. In this case, I've used the long shadows from the bare silver birch trees to give depth to the scene. Although I was shooting straight into the sun, I avoided flare by using the trees to block and diffuse the sunlight. I also overexposed by a couple of stops to ensure detail was retained in the trees.

Technique christmas projects

Hestive focus

Pleasing bokeh always enhances an image, but modifying it can introduce a fun, Christmas-themed twist. **Callum McInerney-Riley** explains how to do it

f you have a lens that's capable of beautiful bokeh, you can use it to create some fun Christmas images. Using only a few items from a craft shop, you can make a shaped iris that allows you to achieve different-shaped bokeh when background light sources are out of focus.

By creating a range of shapes, such as snowflakes or Christmas trees, you can introduce a Christmas theme to almost any subject. Here, we show you how to make the modifier and explain what kit is best. We also give some general tips on how to get the best results.

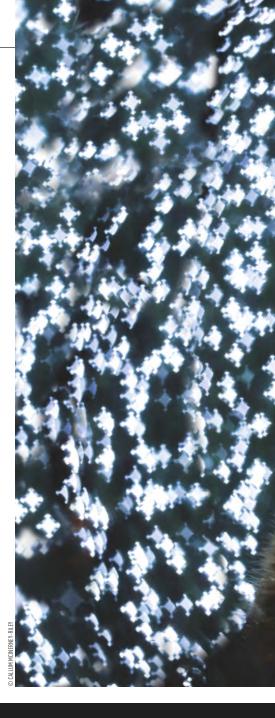

For this technique, you'll need a longfocal-length lens with a fast maximum aperture to achieve a good defocused background when shooting wide open. As well as your camera and lens, you will also need an A4 piece of black card, a compass, a pencil, a ruler, some tape and a scalpel or craft knife to make the bokeh shapes.

Shooting tips

To achieve these bokeh shapes, you will need small but bright light sources that can be defocused. Christmas tree lights are one of the best light sources.

Both still life and portraits can be shot using this technique. However, the modifier does block out a fair few stops of light. Instead of pushing the ISO high to get an exposure, try using fill-in flash on manual power for your portraits to balance the exposure. Also, for still-life images, try using a tripod and a slow shutter speed to achieve the shot.

To shoot using your modifier, shallow depth of field is key. To achieve this, place the subject close to the camera and shoot with the widest aperture possible. Then, with your modifier attached to the front of the lens and the lights far enough from the subject, you can take the shot.

HOW TO MAKE IT

1 Cut card to length

Take a piece of card long enough to wrap around your lens, and, using a scalpel, cut a 3-4cm strip from it. Wrap this strip around your lens reasonably tightly, and tape it in place.

2 Use a compass

Using a ruler, measure the diameter of the card circle, then set your compass so that the distance between the compass point and the pen equals half the circle's diameter, plus approximately 1mm. For example, my circle was 75mm across, so I set the compass at 38mm to achieve a 76mm circle.

3 Make circle

Using your compass, draw a circle on the remaining paper. Push down hard with the pointed end to ensure you can keep track of the centre point. Next, widen the compass by 1cm and draw a second circle around the first one, using the same centre point. Repeat to make more than one.

4 Make shapesSet the compass to 10mm and draw a circle in the middle. Draw your desired bokeh shapes inside this small circle. Try to keep the shapes between 12mm and 18mm to allow enough light to come through, although the size may vary between lenses.

5 Be precise
With everything drawn, it is time to cut it all out. Using a scalpel, cut out your bokeh shape as neatly as possible. Torn paper in the corners will result in jagged bokeh.

6 Finishing touchesCut out your circle around the outer edge. Then, at 1cm intervals, snip into the inner circle. Do this all the way round the circle. Fold in the resulting flaps, place the card circle over the paper hood and tape it in place.

The perfect Christmas gift.

- Go digital, it's free

Photoshop Challenge

Fancy a challenge? Download this image from our website and see how creative you can get in Photoshop...

f you fancy yourself as a bit of a Photoshop whizz, then why not take the Photoshop Challenge? All you have to do is download our start image from www. amateurphotographer. co.uk, search for 'Photoshop Challenge' and then let your creativity run wild, transforming this shot into something much more unusual.

The only rules are that you don't breach anyone's copyright, so if you want to combine the start image with any other shot, it has to be yours or you have permission to use it, while there are a host of affordable stock libraries out there as well. Otherwise, you can do what you like - cut it out, transform it, use multiple layers, change the colours... it really is up to you.

Once you've finished, upload it to our Photoshop Challenge gallery and we'll pick our favourite. The closing date is 14 January 2015, and the winner will receive a year's digital subscription to AP.

Win!

Simply download the image from the link below and then it's down to you to use all your image-editing skills to end up with something really creative. What route you choose is entirely up to you, but we are looking for striking changes, not subtle adjustments. The winner will receive a year's digital subscription to AP worth £79.99

Download our start image from www.amateurphotographer.co.uk/photoshopchallenge

Insure your camera and accessories today against theft and accidental damage

Our flexible cover allows you to build your policy to meet your needs. Cover includes:

- Options for up to £25k worth of cover
- Up to £1m optional Public Liability cover
- The option to protect your equipment when it is in your vehicle
- A choice of UK, EU and Worldwide cover
- Up to £1k worth of equipment hire whilst waiting on replacement in the event of a claim

V P RUH LUMP V

At this time of year, we like to look back at the technology we have seen over the past 12 months, and what we may see in the years to come. **Richard Sibley** recalls the predictions we have made in the past, while **Andy Westlake** looks at this year's technology and how it may evolve in the future

or a number of years, we have used the final issue of the year to look into our crystal ball and predict how cameras and photography may evolve in the future. While we're in the privileged position of being able to try out all the latest equipment and technology, and I would like to think that we get a good feel for what might happen next, our predictions are, by necessity, based on educated guesses, speculation and the occasional punt. If we did know anything for certain, the chances are that we couldn't report on it, due to the very strict non-disclosure agreements we have to sign.

Rather than go straight in with the new technology we

have seen this year and how we think it will influence the coming years, we thought it would be interesting to look back at our past predictions and see just how accurate we have been, and where we have – so far, at least – been way, way off.

The past

Full frame - will it ever take off?

For a few years, we predicted that DSLR cameras with full-frame sensors would become more common. Way back in 2003, then technical editor Damien Demolder predicted that Nikon would have two DSLR ranges, each with a different sensor size.

'It is not inconceivable that the company will run two digital SLR systems alongside each other; the DX series for high-end enthusiasts and amateur users, and a full-frame series for professionals,' he stated. 'It certainly looks as though this is the way Canon is going with its EF and EF-S-mount cameras. I guess only time will tell.'

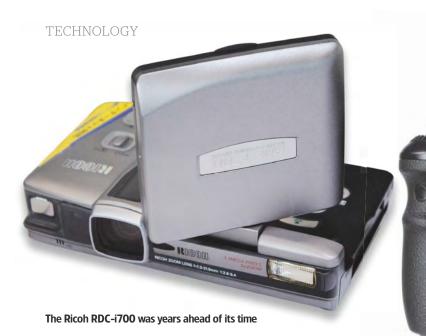

Some three years later, Nikon still hadn't released a full-frame DSLR. In our Christmas issue of 2006, there was further speculation as to whether Nikon, and Sony, would one day introduce such a camera. Remember, at that time Canon was the only manufacturer with a full-frame DSLR in its line-up, with Damien Demolder commenting that, 'If

Nikon used a larger sensor in its higher-end products, it would be able to improve image quality by a measurable degree.'

Much of the basis for the speculation about the introduction of more players in the full-frame DSLR market came from Zeiss manufacturing full-frame lenses in the Sony/Minolta A-mount.

'I would be very surprised if Sony went into film-camera production in the future and can hardly believe that Zeiss would be bothered servicing the needs of the [Minolta] Dynax 7 and 9,' Damien added.

It was, of course, just nine months later, in August 2007, that Nikon announced the full-frame D3 DSLR. Sony actually previewed the Alpha 900 full-frame camera just a few months later, at the

PMA show in March 2007, although it took a year and a half before the company announced the camera at Photokina in September 2008.

Connectivity

It is funny that as much as things change, so much stays the same. In AP 23 December 2000, we wrote about the Ricoh RDC-i700, which featured what we described as a 'large, laptop-like screen'. We wrote, 'How do you fancy a digital camera that can be used to email your images anywhere in the world? Or maybe you'll want to surf the internet, or maintain your website while in the field. Need to send an urgent fax from the top of a mountain? No problem.'

It's a pretty accurate summary of what we're able to do now, except maybe the bit about sending a fax. And just how large was the laptop-like screen? 'A 3.5in LCD that has touchscreen capability using the stylus pen provided.' I had never heard of the Ricoh RDC-i700 until I came to write this article. Its major flaw seems to have been that it was just too

far ahead of its time, lacking the suitable infrastructure to make connectivity so simple.

Back in 2005, we were talking about the wireless transfer of images, although obviously at the time we had no idea quite how it would take off and how it would be utilised. Remember, it would be another two years before the Apple iPhone was released, which would change the way we used wireless connectivity to control other devices.

'The next big thing is wireless image transfer,' said Damien. 'Kodak managed to be the first to announce a model with wireless built-in, but then still failed to be the first to bring a camera to the shops. Both Canon and Nikon rather spoiled the party by introducing the lxus wireless and Coolpix P1 respectively. Wireless communications between cameras, computers, printers and email systems is bound to be a massive area in the coming years – the printer dock will be out of date even before it has time to get comfortable.'

We are also still waiting for a

'Wireless communications between cameras, computers, printers and email systems is bound to be a massive area in the coming years'

DSLR with a SIM-card slot for 3G or 4G connectivity – something I predicted in 2012. However, the Samsung Galaxy NX was the first CSC to feature a SIM-card slot, and we have seen a few more serious camera phones, notably the Panasonic Lumix DMC-CM1. Of course, you can connect to a mobile phone via Wi-Fi and transmit your images in that way, but I still think that eventually you will be able to bypass this tethering and have a mobile connection

directly from a DSLR or compact system camera.

Peek-a-boo

In 2003 we said: 'Canon showed some interesting concept ideas: see-through cameras; cameras that track a moving subject; cameras that fire only when the subject smiles; and cameras that recognise individuals through head shapes and features were just a few.' At the time, we had no idea that face detection would

By 2009, face-detection features could pick out individuals

The 2005 Nikon Coolpix P1 digital compact camera with wireless connectivity

The D3 and Alpha 900 were the first full-frame **DSLR** cameras from Nikon and Sony respectively

evolve into a feature that is now pretty standard on all cameras.

Three years later, in 2006, we wrote about how both Canon and Fujifilm had introduced face-detection features in its compact cameras, and by 2009 we had face recognition that could pick out individuals. However, we are still waiting for the ability to send images automatically to the person who has been recognised in an image, as we predicted back then

Four thirds

As you can see from the subjects I've already covered, we don't always get things right! Back in 2003 we wrote, 'We should also remember that Fujifilm was one of the original partners in the [four-thirds] system, but the company is keeping tight-lipped about its commitment and involvement. I can't believe the company will not launch something during the next 12 months, so watch out."

Fuiifilm released the S3 Pro in 2004, and later the S5 Pro, before the Fujifilm X100 enthusiast compact, all of which featured APS-C-sized sensors. Interestingly, Fujifilm is still listed on the four thirds website as one of the supporting companies (www. four-thirds.org/en/contact/ group.html).

'We are still waiting for the ability to send images automatically to the person who has been recognised in an image, as we predicted back then'

It was 2006 when many features that are now common were introduced

Still waiting for a level horizon mode

One feature we have yet to see, and which we predicted (or wished for) in 2009, is a horizon level that is linked to a timer 'so the level could be used to trigger the shutter as soon as the camera is horizontal. It would put an end to sloping horizons when shooting handheld."

We still don't have Photoshop in-camera, but it is on smartphones

In-camera image editing

With the advent of digital technology, the ability to edit images in-camera was the obvious next step. As early as 2006, we predicted that the in-camera raw conversion offered in Samsung and Pentax DSLRs could be the first step towards 'building Photoshop into the camera and bypassing the computer altogether'.

Did we get this one right? Well, sort of. With cameras now available that run an Android operating system, there is always the option of downloading Adobe Photoshop Touch, which does offer the same basic controls you find in the full version of Photoshop, including Levels, masking and retouching features.

Power beyond its size

The new Nissin i40 mini flash.

Introducing Nissin's new pocket size flashgun, the i40. Weighing in at just 203g and measuring only 85mm high, this high specification flash is ideal for travelling.

Although compact, the i40 packs a real punch with a guide number of GN40 at ISO100. It boasts an auto zoom range of 24 – 105mm (16mm with built in diffuser) and supports up to 1/8000th second shutter speed. Other features include LED video light function, Wireless TTL and a bounce and swivel head - all wrapped up in a stylish design with easy to use intuitive controls.

The i40 is available in Canon, Nikon, Sony, Four Thirds and Fuji fit.

The present and the future

Sensor advancements and the long, slow demise of the DSLR

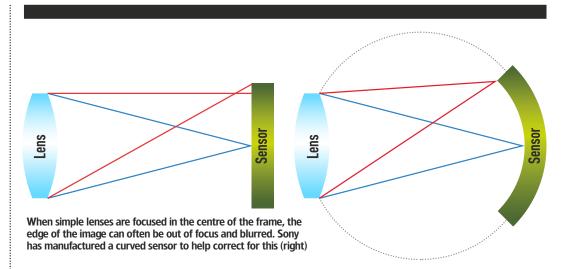

One of the more telling stories of 2014 has been the progress in sensor technology. We've seen the medium-format market make a long-overdue switch to CMOS technology, with the Pentax 645Z offering the best overall image quality of any camera we've ever tested, courtesy of a new Sony chip. In a way, this simply echoes the shift that DSLRs made away from CCD sensors seven or eight years ago, but it re-establishes a clear image quality gap between the best full-frame cameras and medium format. This in turn gives high-end full-frame models something new to play catch-up with. This is how progress is driven.

BSI sensors offer increased efficiency compared to conventional designs

The other standout new chip is Samsung's 28-million-pixel BSI CMOS in the NX1. First, it's the new resolution champion for APS-C format, surpassing Sony's various 24-million-pixel sensors that first appeared more than three years ago. Second, it's the first APS-C sensor to use backside illumination technology to improve its sensitivity, which means that this extra resolution doesn't come at the cost of dynamic range or high ISO noise. But perhaps most interestingly, it's one of a new breed of sensors (alongside Sony's latest 24-millionpixel offerings) that includes phase-detection elements across the entire sensor for autofocus.

This matters because it helps the

Curved sensors: nice but niche

LAST year we talked about curved sensors, and this year we finally saw them for real. Or at least, Sony presented two prototype sensors, one full frame and one compact-camera-sized, at an academic conference (namely the Symposium on VLSI Technology in June). Sony also released a

sample image made using the smaller of these sensors, demonstrating that they do work. But what we haven't yet seen is an actual camera.

Why curved sensors? Well, potentially they allow the use of simpler (and therefore smaller and cheaper) lenses, while giving better imaging performance in the corners of the frame. This is because simple lenses exhibit curvature of field, whereby the corners of the image are brought into focus at a slightly different distance to the centre. Usually this is corrected optically with additional lens elements, but this adds size and complexity to the design, while also introducing other aberrations.

If a sensor can be made to match the lens's natural field curvature, this problem is solved, and we should see improved corner-to-corner imaging performance in a smaller overall package. However, it should also be apparent that curved sensors have to be matched to specific lens designs, so they seem unlikely to be used in interchangeable-lens systems. What's more, it's difficult to design a zoom lens that maintains the same field curvature at all focal lengths, so this technology is most likely to be used with primes.

Given the sensor sizes Sony has made – full frame

This is a prototype of Sony's curved sensor, as shown at the Symposium on VLSI Technology in June

and 2/3in size – it seems this technology has been targeted initially to specific products. I think that the smaller sensor is more likely to appear in a premium smartphone than in a compact camera – it could allow much higher image quality without adding much to the device's thickness, which is a fundamental design consideration for mobile

technology. As for the full-frame one, given the need for matching the sensor to a specific lens design, it doesn't need the insight of Nostradamus to predict that it's best suited to a fixed-lens premium compact. Maybe we'll see it in an RX2 at some point next year.

Curved sensors are most likely to be used in premium fixed-lens compacts like the Sony Cyber-shot DSC-RX1

Samsung NX1 to out-spec any APS-C DSLR in terms of autofocus and continuous shooting. It can (on paper) shoot at 15 frames per second, while continuously adjusting focus and monitoring subject movement. What's more, it can track the subject to the edges

of the frame and still keep focusing.

To anyone who's not really been following developments this year, such talk may well sound like fantasy. It's not so long ago that compact system cameras couldn't follow focus on moving subjects at all, and even now some don't even

try. But this year we've seen one of the big advantages of the DSLR design – its superior focus-tracking performance – start to be seriously challenged. Cameras such as the Fujifilm X-T1, Sony Alpha 6000 and even the relatively inexpensive Sony Alpha 5100

MACRO PHOTOGRAPHY

SEMINAR WITH HEATHER ANGEL

Due to popular demand, on Wednesday 11 February 2015 we are delighted to welcome back Heather Angel, the renowned wildlife photographer with a passion for plants, mammals

and macro photography.

See how reflectors, diffusers and fill flash help to improve macro shots in the field. Discover how to gain arresting macro still-life shots with simple lighting – including window light, LED lights, fill flash and a light box. Examples of how depth of field is enhanced using focus stacking will also be shown and explained.

This exclusive seminar is held at the home of Amateur Photographer and What Digital Camera in the Blue Fin Building, rising above the impressive skyline of London's South Bank.

Tickets are sold on a first-come, first-served basis at £39 per head, to include a presentation and Q&A session with Heather Angel from 6pm-8.30pm.

For full details visit www.amateurphotographer.co.uk/macro or call 0203 148 4326

Book your place

have a continuous shooting and autofocus performance that genuinely rivals DSLRs.

This trend will surely continue, and as the technical advantages of DSLRs are increasingly chased down by compact system cameras, the venerable DSLR design will inevitably decline in importance. It is, after all, a film-era concept, albeit a highly refined one, but its reliance on separate AF and metering systems makes it mechanically complex and physically bulky. Now it's certainly true that the optical viewfinders of DSLRs bring specific advantages (including speed-of-light viewing and low power consumption), which will continue to make them first choice for some purposes, but I can't help feel that for the vast majority of photographers, CSCs will eventually become the weapon of choice. This won't be a quick process – it will take a while to persuade photographers to part with their lens collections, for a start - but it will surely happen in the not-too-distant future.

High-resolution video, and its convergence with stills

One of our highlight projects of the year was to shoot our cover using 4K video, which was published in our 20 September issue. We know full well that a lot of our readers have little or no interest in video

itself, and that's fair enough, as movie making is a rather different pursuit to photography. But we do think that the opportunities offered by high-resolution video as a means of

producing still images look pretty exciting.

So why should photographers care about high-resolution video? The key point is that individual frames can be extracted from the footage, and are of sufficiently high quality to be used as still images. I'm sure some readers will be thinking sceptically about the low-quality video they've seen from their cameras, but this is a red herring, as high-resolution video is often disproportionately higher in quality compared to full HD than its increased pixel count suggests.

In fact, using 4K video isn't really much different to shooting 8-million-pixel JPEG files in high-speed continuous-drive mode. But the crucial differences are the frame rate and shooting duration – you can record at 25

A 4K frame is equivalent to an 8-million-pixel still, and offers sufficiently high image quality for us to have used it for our cover back in September

short, hopefully well-timed bursts.
To be honest, I was expecting to see more cameras capable of shooting 4K video at Photokina this year – in the end, there was just a handful. It seems that only the big electronics companies

frames per second for minutes on

end, rather than being limited to

in particular
Panasonic
have
overcome the
challenges

with buffering

and processing the huge data throughput right now. But I fully expect to see 4K video recording to become as

commonplace in a couple of years' time as full HD video is now.

For this to work well, manufacturers will have to provide tools that make it easy to automatically identify and extract key frames from video footage, such as a moment when everyone in a group shot is smiling at once. Panasonic's new '4K photo' mode is a promising start, and Nikon's 'best shot selector' has offered variations on this theme for years, albeit based on bursts of still images.

Resolution won't stop at 4K, either. At Photokina, we were treated to a demo of the Red Epic Dragon, an enthusiastically named camera that's capable not only of recording 6K video (equivalent to 19-million-pixel stills), but also of doing so in a raw format that can be freely adjusted for colour, white balance and exposure. This is some way off being mainstream at the moment - it's hugely processor intensive, which makes power supply and heat dissipation both serious problems - but it's the shape of things to come. And after that, we'll move onto 8K.

Many photographers will disapprove of this idea, just as many now don't shoot in continuous-drive mode, instead preferring to catch the right moment using their own judgement. But certain kinds of unpredictable motion don't really lend themselves to this approach, and high-res video will simply be a new tool to make it easier to capture images that require split-second timing. It will surely be on every new camera in a two or three years' time.

The Red Epic Dragon is capable of recording

6K video at 100 frames per second in raw

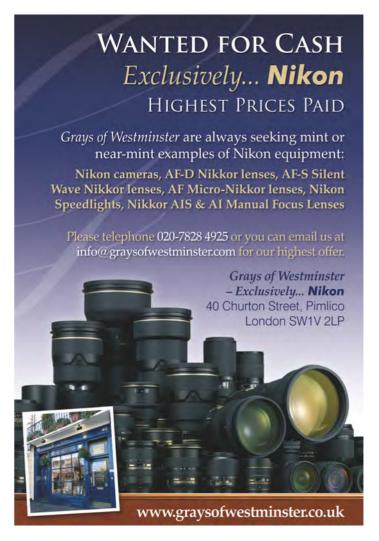

format, giving 19-million-pixel stills

Compact cameras get better, and smarter

Just as smartphones continue to improve, compact cameras will have to adapt to this new challenge. One of the most notable trends of 2014 has been the emergence of the large-sensor zoom compact as a recognisable mainstream class of camera, with Canon's PowerShot G7 X becoming a direct competitor to the Sony Cyber-shot DSC-RX100 series, and the Panasonic Lumix DMC-LX100 offering an alternative take on the concept. It seems unlikely that other companies, such as Olympus and Nikon, can allow themselves to be left behind for long, and I think this will be the most exciting and innovative sector of the market over the next year or two.

Maybe, though, cameras will also learn to cooperate better with smartphones, or even attempt to replace them altogether in your

Nokia made this case for the Lumia 1020 with a grip, shutter button and battery

pocket. We've spent the past couple of years watching Wi-Fi progress from being a novelty feature to one that few manufacturers dare leave out of any camera. But now that almost every new camera can connect to a smartphone for image sharing and remote control, what next?

One possibility might be that cameras themselves adopt phone technology. We've already seen Samsung's Galaxy Zoom attempting to marry a conventional compact camera with a smartphone, for example. But Panasonic's Lumix DMC-CM1 offers an intriguing glimpse of a better way to do things, by keeping the camera function distinctly separate from the Android device. Indeed, Panasonic seems to want

you to think of the CM1 as a compact camera that happens to have a smartphone on board, rather than a phone with a decent camera. This would allow the camera to function as an autonomous smart device, no longer reliant on a phone to deliver a social media fix.

One problem lies with form factor – cameras are shaped very differently from smartphones, and as yet nobody's quite managed to produce a genuinely successful sales of compact cameras. After all, if you're carrying your phone around all the time, and it has serviceable image quality, why carry a camera too? It's clear that this is how the majority of the non-photoenthusiast population thinks, and increasing numbers of more serious photographers are making good use of their smartphones, too.

These devices have disadvantages, though, which is why camera makers have spent time and effort on a new breed of

The Panasonic Lumix

DMC-CM1 is a true camera/
phone hybrid

LEICA

Compact cameras that offer very

compact cameras that offer very real advantages in terms of lens flexibility and image quality. But don't for a moment think the likes of Apple will stand still – they'll continue to try to improve their cameras, to gain a competitive advantage over their rivals.

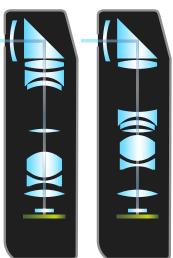

So what shape might this take? At the moment, camera phones have one thing in common: fixed, wideangle prime lenses, dictated in part by their slimline form factor. But this leaves them short on image quality in many situations, such as when shooting pictures of people, which traditionally look best with longer lenses. At the moment, phones only offer low-quality digital zooms, but I'd expect to see optical zooms soon, most likely of the space-saving 'periscopic' type. Multi-lens or even multi-camera systems are another possibility, which could allow the user to switch to a telephoto effect without needing a complex lens or digital zoom. This isn't exactly a new idea. because before zoom lenses became ubiquitous on 35mm compact cameras, quite a few had dual-lens systems to offer two focal lengths. Sooner or later, a smartphone has to do it, too.

Larger sensors may become more common, as well. We've already

The HTC One (M8) uses two cameras, with one for depth information

seen how this can be done, in devices such as the Panasonic Lumix DMC-CM1 and the legendary Nokia N808. There seems to be no getting away from the fact that this will add thickness to the device, though, which is anathema to the general consumer (not to mention the companies' advertising departments, which seem to be perpetually applying 'world's slimmest' labels to products that are already too thin to hold comfortably). So it will probably be a niche feature. aimed specifically at attracting photographers.

The Minolta Dimage used a fully internal zoom lens, right back in 2002

comes impressively close for a first-generation product. It's just about slim enough to replace a phone in your pocket, but its handling as a camera is compromised. However, this needn't be an insuperable problem. For example, add-on grips could aid handling and increase battery life, perhaps as part of a clip-on case, while phone calls would just need a Bluetooth headset (that could also act as a remote control). There's certainly space here for

fusion between the two. The CM1

The relentless rise of the smartphoneOver the past few years,
smartphones have decimated the

experimentation, if manufacturers

are bold enough.

The year's best books

Some exceptional photography books were released in 2014. Oliver Atwell takes a look at a few of the best

Uncommon Places: The Complete Works

by Stephen Shore, Thames & Hudson, £39.95

The legacy of Stephen Shore's Uncommon Places cannot be overstated. While many cite William Eggleston as the pioneer of colour photography, Stephen Shore more than did his bit to take colour beyond the domain of advertising and fashion imagery. The subjects that formed the body of his work were no less influential: this updated edition features 15 previously unseen images and includes discussions with the artist, offering readers insight into what it means to produce - and update - such an enduring legacy.

Fictions

by Filip Dujardin, Hatje Cantz, £35 Architecture and fiction need not be strangers to one another, and Fictions, a project that Ghent-based photographer Filip Dujardin has been working on since 2007, proves this beautifully. A closer look at the structures that dominate Dujardin's work reveals something startling: they are impossible. Using a digital collage technique and a series of processed, edited and repurposed images of existing buildings around Ghent in Belgium, Dujardin has created a series of mind-bending structures that are astonishing. Others are simply defiant, with the most basic principles of

Photography Today by Mark Durden, Phaidon, £45

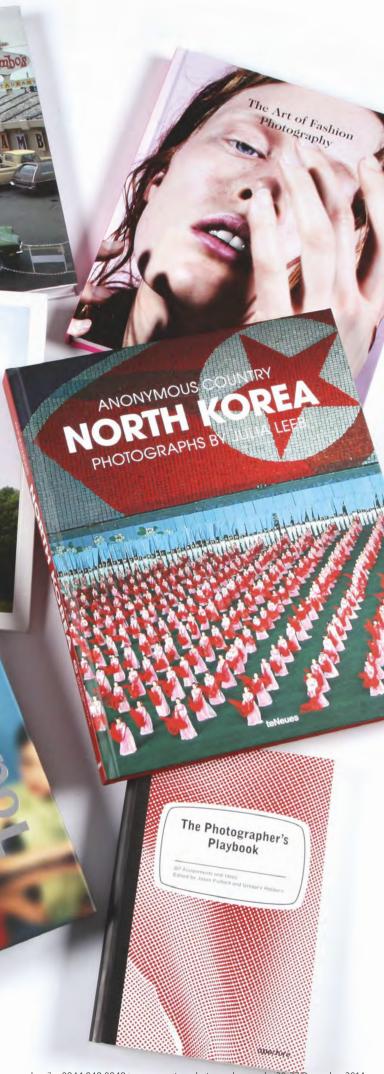

In this epic tome, writer, artist and lecturer Mark Durden presents a survey of contemporary art photography from the past 50 years – and has perhaps presented a volume that will enter photography-book lore. The 11 chapters focus on recurring and relevant subjects. It's a structure that makes the navigation of such a fluctuating medium (in both theory and practice) all the more pleasing. Durden analyses 500 works from 150 photographers and breaks

down why their images work and why

these photographers have established themselves as vital, progressive artists. Photography Today is essential for those who are interested in where photography has been - and where it is going.

The Art of Fashion Photography

by Patrick Remy, Prestel, £35

Fashion photography is a genre that, for many, can seem stuck in the work of past masters such as Cecil Beaton and Horst P Horst. What this book, compiled by Patrick Remy, attempts to do – brilliantly, it must be said – is bring the genre up to date and offer an overview of where fashion photography is now. The genre is, arguably, one of the most subtly political forms of photography. Within

its parameters we find photographers addressing gender issues, the psychology of advertising and the malleability of the human body. If you think that fashion photography is always about a model displaying a fancy garment, this book will make you think again. This is a highly recommended volume.

North Korea: Anonymous Country

by Julia Leeb, teNeues, £65

In recent years, as an increasing number of official reports and first-hand stories are revealed, the secret state of North Korea has become a source of fascination for Western audiences. Many books are now available and many more photographers are entering the country's borders to document the things they see. This latest volume from photojournalist Julia Leeb is certainly one of the most impressive. Leeb has successfully blended large-scale cultural events with quiet everyday scenes. As a result, we have a book that offers a relatively clear picture of life in North Korea. The large-scale nature of the book is crucial, particularly when it comes to the scenes of staggering architecture and massive synchronised dance spectacles. An impressive achievement.

The Photographer's Playbook

by Jason Fulford and Gregory Halpern, Aperture, £16.95

This wonderful tome from Aperture has one basic credo: the best way to learn is by doing. Contained within its pages you will find 307 assignments and ideas from some of the world's top photographers and writers. Much of it offers straightforward tasks, while other sections offer titbits of wisdom. Take Justine Kurland's contribution, for example: 'When a student makes cliché photographs, I suggest they do a Google search to find how many people have made the same pictures.' It's a simple but vital point. Some ideas are abstract, some are blindingly obvious, but they are all immensely fun and inspiring. This is a fantastic book and worth every penny.

Billy Currie

Winner of the EISA Photo Maestro award

Formatt-Hitech 16-stop Firecrest ND filter

For me, the best piece of kit released this year, and one that I had to purchase for myself, was the Formatt-Hitech 16-stop Firecrest ND filter. Just to have the ability to expose for several minutes in bright sunshine while still using optimal camera settings makes it a definite winner. Couple this with

Christopher Bonanos

Author of Instant: The Story of Polaroid

The Impossible Project B&W Instant Film for SX-70

I've become quite fond of The Impossible Project's black & white SX-70 film. It's a much more mature product - more stable, easier to shoot - than its colour line, which is still somewhat uneven.

I also bought myself 50 packs of Fuji FP-3000B, the gorgeous ISO 3000 black & white instant film that was just discontinued. I had to buy a mini-fridge for it, to extend its life as far as I can.

I am most excited for New55, the reintroduced and re-engineered version of Polaroid's old Type 55 film. It was the only instant film that produced both a black & white positive print and a reusable negative, and it was a favourite of Ansel Adams. A small company in Massachusetts put

up a Kickstarter campaign last year and raised nearly half a million dollars to tool up and start manufacture. The first boxes of film will be shipped early in 2015.

Vietnam-based photographer

City Explorer 002 Ranger bag

Most photography bags, in my opinion, are really ugly and are simply made to be practical. I'm into style and practicality. With that in mind, the handmade leather/ canvas City Explorer 002 Ranger bag made by Wotancraft in Taiwan is the perfect fit for a photographer who doesn't want to look like a photographer.

AP's Photoshop expert

Sony 50-million-pixel medium-format sensor

I reviewed a few cameras that were all new to 2014, including the Hasselblad H5D-50c and Pentax 645Z, both fitted with Sony's 50-million-pixel mediumformat sensor. I also reviewed the Rotolight Anova LED and Profoto B1 off-camera flash kit.

I bought a few video lights, a nice GT Glidetrack, a shoulder rig from Filmcity and a Zoom H4n. Overall, I was most impressed by the Sony 50-million-pixel mediumformat sensor and the quality this gave to handheld medium-format

photography. I would ideally like to see a medium-format CSC-type camera evolve, but that is perhaps a bit of a long shot for Sony because of the need for a dedicated set of system lenses. However, Phase One will shortly be introducing a new series of medium-format CSCs.

Alex Mustard

Underwater photographer

Nauticam Super Macro Converter

The Nauticam Super Macro Converter is a converter lens specifically designed for underwater photography, and it truly extends my capabilities as a photographer. It allows me to shoot super-macro images at very high magnifications that I simply could not produce previously. The image quality is excellent and it has been specifically designed to maintain a longer camera-to-subject distance than you would normally get for such magnifications.

The lens can even be taken off or attached underwater, which isn't usually possible. I used it to take my winning shot from this year's Wildlife Photographer of the Year award.

Lars Rehm

Camera technology writer

Swiftcam M3 handheld gimbal

The Swiftcam M3 handheld gimbal for smartphones uses built-in gyroscopes and electric motors to stabilise your device when shooting videos. In combination with a current high-end smartphone, some of which are capable of recording 4K video, the Swiftcam M3 allows for the capture of very smooth and professional-looking footage that not too long ago would have required equipment worth thousands of pounds.

Drew Buckley

Outdoor photographer

Canon EF 16-35mm f/4L IS USM

The best piece of kit for me in 2014 was probably the new Canon EF 16–35mm f/4L IS USM lens. I use this focal range mostly for my landscape images, but also for interiors and weddings. Previously, I used Canon's 17–40mm f/4L lens, which did a more than adequate job, but it was never all that sharp in the corners. The other option was the Canon EF 16–35 f/2.8L II USM, but at twice the price of the 17–40mm f/4L, I made the best of what I had. The EF 16–35mm f/4L IS USM meets all my requirements. Super–sharp in the corners, even wide open, and image stabilisation for handholding was a real bonus. It's a real move forward in the lens range.

A selection of editors, writers and photographers take a look back over 2014 and choose their favourite photography items from this year

Tim Taylor

Fine-art travel photographer

F-Stop Satori EXP

While on a recent expedition in the Himalayas attempting to climb an 8,000m peak, a favourite piece of kit emerged. It is neither a camera nor a lens – it's a camera bag: the F-Stop Satori EXP. It's a fantastic camera bag and perfect for big expeditions as well as everyday use. I have been out in the Himalayas for over two months now and have used this bag

in all conditions, ranging from +30°C on the jungle walk-in to -30°C at over 6,800m on the mountains, and it has become a firm favourite. It keeps my camera gear safe and allows me the room to carry my mountaineering equipment at the same time. It also makes a great pillow! The bag has clearly been well thought out and designed by people who understand the needs of the photographer.

Learning in a snapshot

At *Amateur Photographer*, we understand that your time is limited, and that you may only want to improve a specific area of your photography. That's why we've designed our **School of Photographic Imaging** Bitesize courses: short courses for those with a specific learning objective.

Lowering the Cost of Printing

We are a small, family owned and run company, specialising in photographic consumables - and proud winners of a 2013 Good Service Award. We are located in Leamington Spa. in the heart of Warwickshire - if you are passing, please pop into our shop, and meet Cooper - our new office dog!

01926 339977 www.premier-ink.co.uk

PRINTER INK CARTRIDGES

At Premier Ink Supplies, we stock two types of cartridges for Epson printers - Originals which are made by Epson, and Compatibles, which are made by a UK company called Jet Tec. Using Jet Tec Compatibles is a way of saving money, without compromising on the quality of your prints. Here're the results from two independent ink tests that agree...

"Jet Tec's colours were superb, with single greys and blacks very close to Epson ...so Jet Tec wins!

- Total Digital Photography Magazine

"What we're looking at here is not only the best choice of ink for the R300 printer, but also the best ink in this group test, period. There's just no getting away from the superb combination of performance and pricing"

- Computer Upgrade Magazine

72mm

82mm

KOOD P-Type Filter System

52mm

The P-Type square/rectangular filter system consists of three parts:

1) An adapter ring that screws onto the front of your lens
2) A filter holder clips onto the ring
3) One or more P-Type (84mm wide) filters

KOOD square filters are manufactured in the UK, and are fully compatible with the Cokin P-Type filter system

UKPHOTODISTRO PRODUCT LINE-UP

The Trigmaster Plus II (TP2) is a transmitter and receiver system built into one pocket-sized unit. It uses a common 2.4G signal to trigger strobes, speedlites and cameras. It also has zone control, relay mode (RL), a max flash sync speed of 1/320s, a range of 500 meters, 6 channels, and more. Whatever your triggering needs, you can easily master them with Trigmaster Plus II. Buy now at this great introductory price, it can't last forever!

Picture Bag · High quality canvas camera bag

- fashionable design, waterproof. Front & inner pockets for all of your gear
- Durable,waterproof canvas
- Special design camera bag
- · Picture may vary from that shown

Wondlan Wireless Follow Focus

Remotely adjust camcorders, SLR cameras and other devices from up to 300m. Switch between 4 memory settings and choose the speed at which you switch. Infrared shutter key, replaces the shutter butter on your camera.

Magnum Speedlight

MG-68 An exciting new flash oun with a variety of features. It has a 4 seconds recycle time, power port which enables 2 seconds flash recycle, precise brightness control,

3 different flash modes, optical sensor, power saving mode, PC sync port and more. Fits most popular makes.

All prices shown **INCLUDE VAT and delivey** to U.K. mainland

XTreme Tether Combines Multiple Products and Features

- · Remote wireless camera triggering
- Wireless monitoring of your cameras view finder (live wireless video stream of your cameras video finder) • Wireless upload of pictures from camera automatically to your device (MAC, iPad etc), while you shoot

Roger Hicks considers...

Cactus and Flowers, Hidalgo, Mexico (2014) by Jerome Sessini

t may seem odd to compare photographs to textiles, but the more you think about it, the easier the comparisons come. Some textiles are rough, homespun, straightforward and to the point; some are delicate silks, light and airy; some are cross-stitch embroideries, carefully constructed; some (like this one) are rich brocades. But what prompts this unusual parallel?

The colours, for a start - those brilliant splashes of orange against the dark cactus, and the bright blue sky. Part of the purpose of a brocade is to look expensive, to impress people, to show that only the best is good enough. Think of the robes of a prelate of the Catholic church, or the surround to a Tibetan thangka (religious painting). Rich colours are a part of this. And yet, even Solomon in all his glory was not arrayed like one of these (Matthew, VI: 29).

Formality

Next, it's very formal. Again, this ties in with the nature of a brocade - an emphasis of the high formal status of someone who can afford expensive fabrics. The cacti are arranged quite symmetrically, and the flowers are pretty much on the thirds, that bane of camera club judges, who are faced with pictures where the principal subject must be placed precisely where the thirds intersect. There's another camera club trick here, too, in the form of 'balance', with the flowers on the lower left 'balanced' by the ones on the upper right. However, I strongly suspect that Sessini did not verbalise all this - he just shot what looked right. Then there's texture. The

textures of a landscape filled

'Of course, a photograph has no texture, but it can remind us of texture, by drawing on common experience'

with cactus and cactus flowers are necessarily different from the textures of a brocade, but texture is an important part of both. Of course, a photograph has no texture - at least, barring relatively minor variations in printing papers but it can remind us of texture, by drawing on common experience. We don't necessarily know what the texture of those flowers is like: are they silky, or waxy, or

papery? But we know that they must be fairly stiff, to maintain those big, spiky shapes, and they certainly contrast with the textures of the cactus and the dry, dusty earth, with which most of us will be familiar.

Finally, what size should the picture be? To stretch the analogy, handkerchief or bed sheet? Once more, the odd analogy makes a strange kind of sense. As reproduced here, the picture is only just

big enough. A double-page spread would be fine. But there would come a point when it would be too big to appreciate. Too small, and it's a scrap of fabric, a rag. Too big, and it's empty ostentation, size for its own sake. Just like brocade.

Again and again in this column, I am struck by the simple truth that there is no 'one-size-fits-all' description of what makes a good picture. It's very much akin to the classic description of pornography: 'I know it when I see it.' Well, that, and remaining open to the possibility that there is more than one kind of good picture.

Roger Hicks has been writing about photography since 1981 and has published more than three dozen books on the subject, many in partnership with his wife Frances Schultz (visit his website at www.rogerandfrances.com). Every week in this column Roger deconstructs a classic or contemporary photograph. Next week he considers an image by Frank Hallam Day

Order by 23rd Dec. for pre-Christmas delivery
